## Ring Size Guide

Ensure this ring size guide is printed on US Letter paper and set to $100 \%$ scale before measuring. Verify the print's accuracy by aligning a credit card with the line below, or fitting the appropriate coin in one of the marked ring sizes. If the card or coin matches perfectly, the guide is ready to use.

## Option 1: Measure by Matching Your Ring

To determine your ring size, select a ring you already own that fits comfortably. Align the inside of this ring with the circles provided below. The correct size is where you can see only the white circle within your ring, without any colored space showing. If you find yourself between two sizes, it's advisable to opt for the larger one.

Option 2: Measure with the Ruler
Once you've trimmed out the ruler, gently slice along the marked line to form a slot. Then, wrap the ruler around the base of your finger, threading the narrow end through the slot. For a comfortable ring fit, it's advisable to measure your knuckle as well. Choose a size that slides smoothly onto your finger.

Please note, sizing options vary by product, and while some larger rings can be resized smaller, the ring size might differ slightly based on the ring's design.

## Ring Size Conversion Chart

| Inside Circumference |  | US, Canada, and Mexico | UK, Australia, Ireland, New Zealand, South Africa | France | Germany, Russia, Ukraine, Asla | India, China, Japan, South America, Turkey, Israel | Italy, Spain, Netherlands, Switzerland |
