ROD TOP TUBULAR FENCES

The A CLASS Rod Top design offers high security while presenting a more approachable appearance. Our Rod-Top panel provides excellent intruder deterrence with a less visually harsh "look." The vertical bars, measuring 25x25mm, are designed for maximum strength and feature a plastic cap at the top for a finished look.

Our Rod Top Fences are crafted with a wide anti-climb gap between the horizontal rails, making them nearly impossible to scale. Made from durable aluminum, A CLASS Rod Top fences are built to last, offering strength and resilience without the worry of rust or warping.

1. Enhanced Protection

Our robust security fence panel are a strong deterrent against unauthorised access and potential intruders. The physical barrier creates a secure environment, reducing the risk of theft, vandalism, and other security breaches.

2. Privacy Enhancement

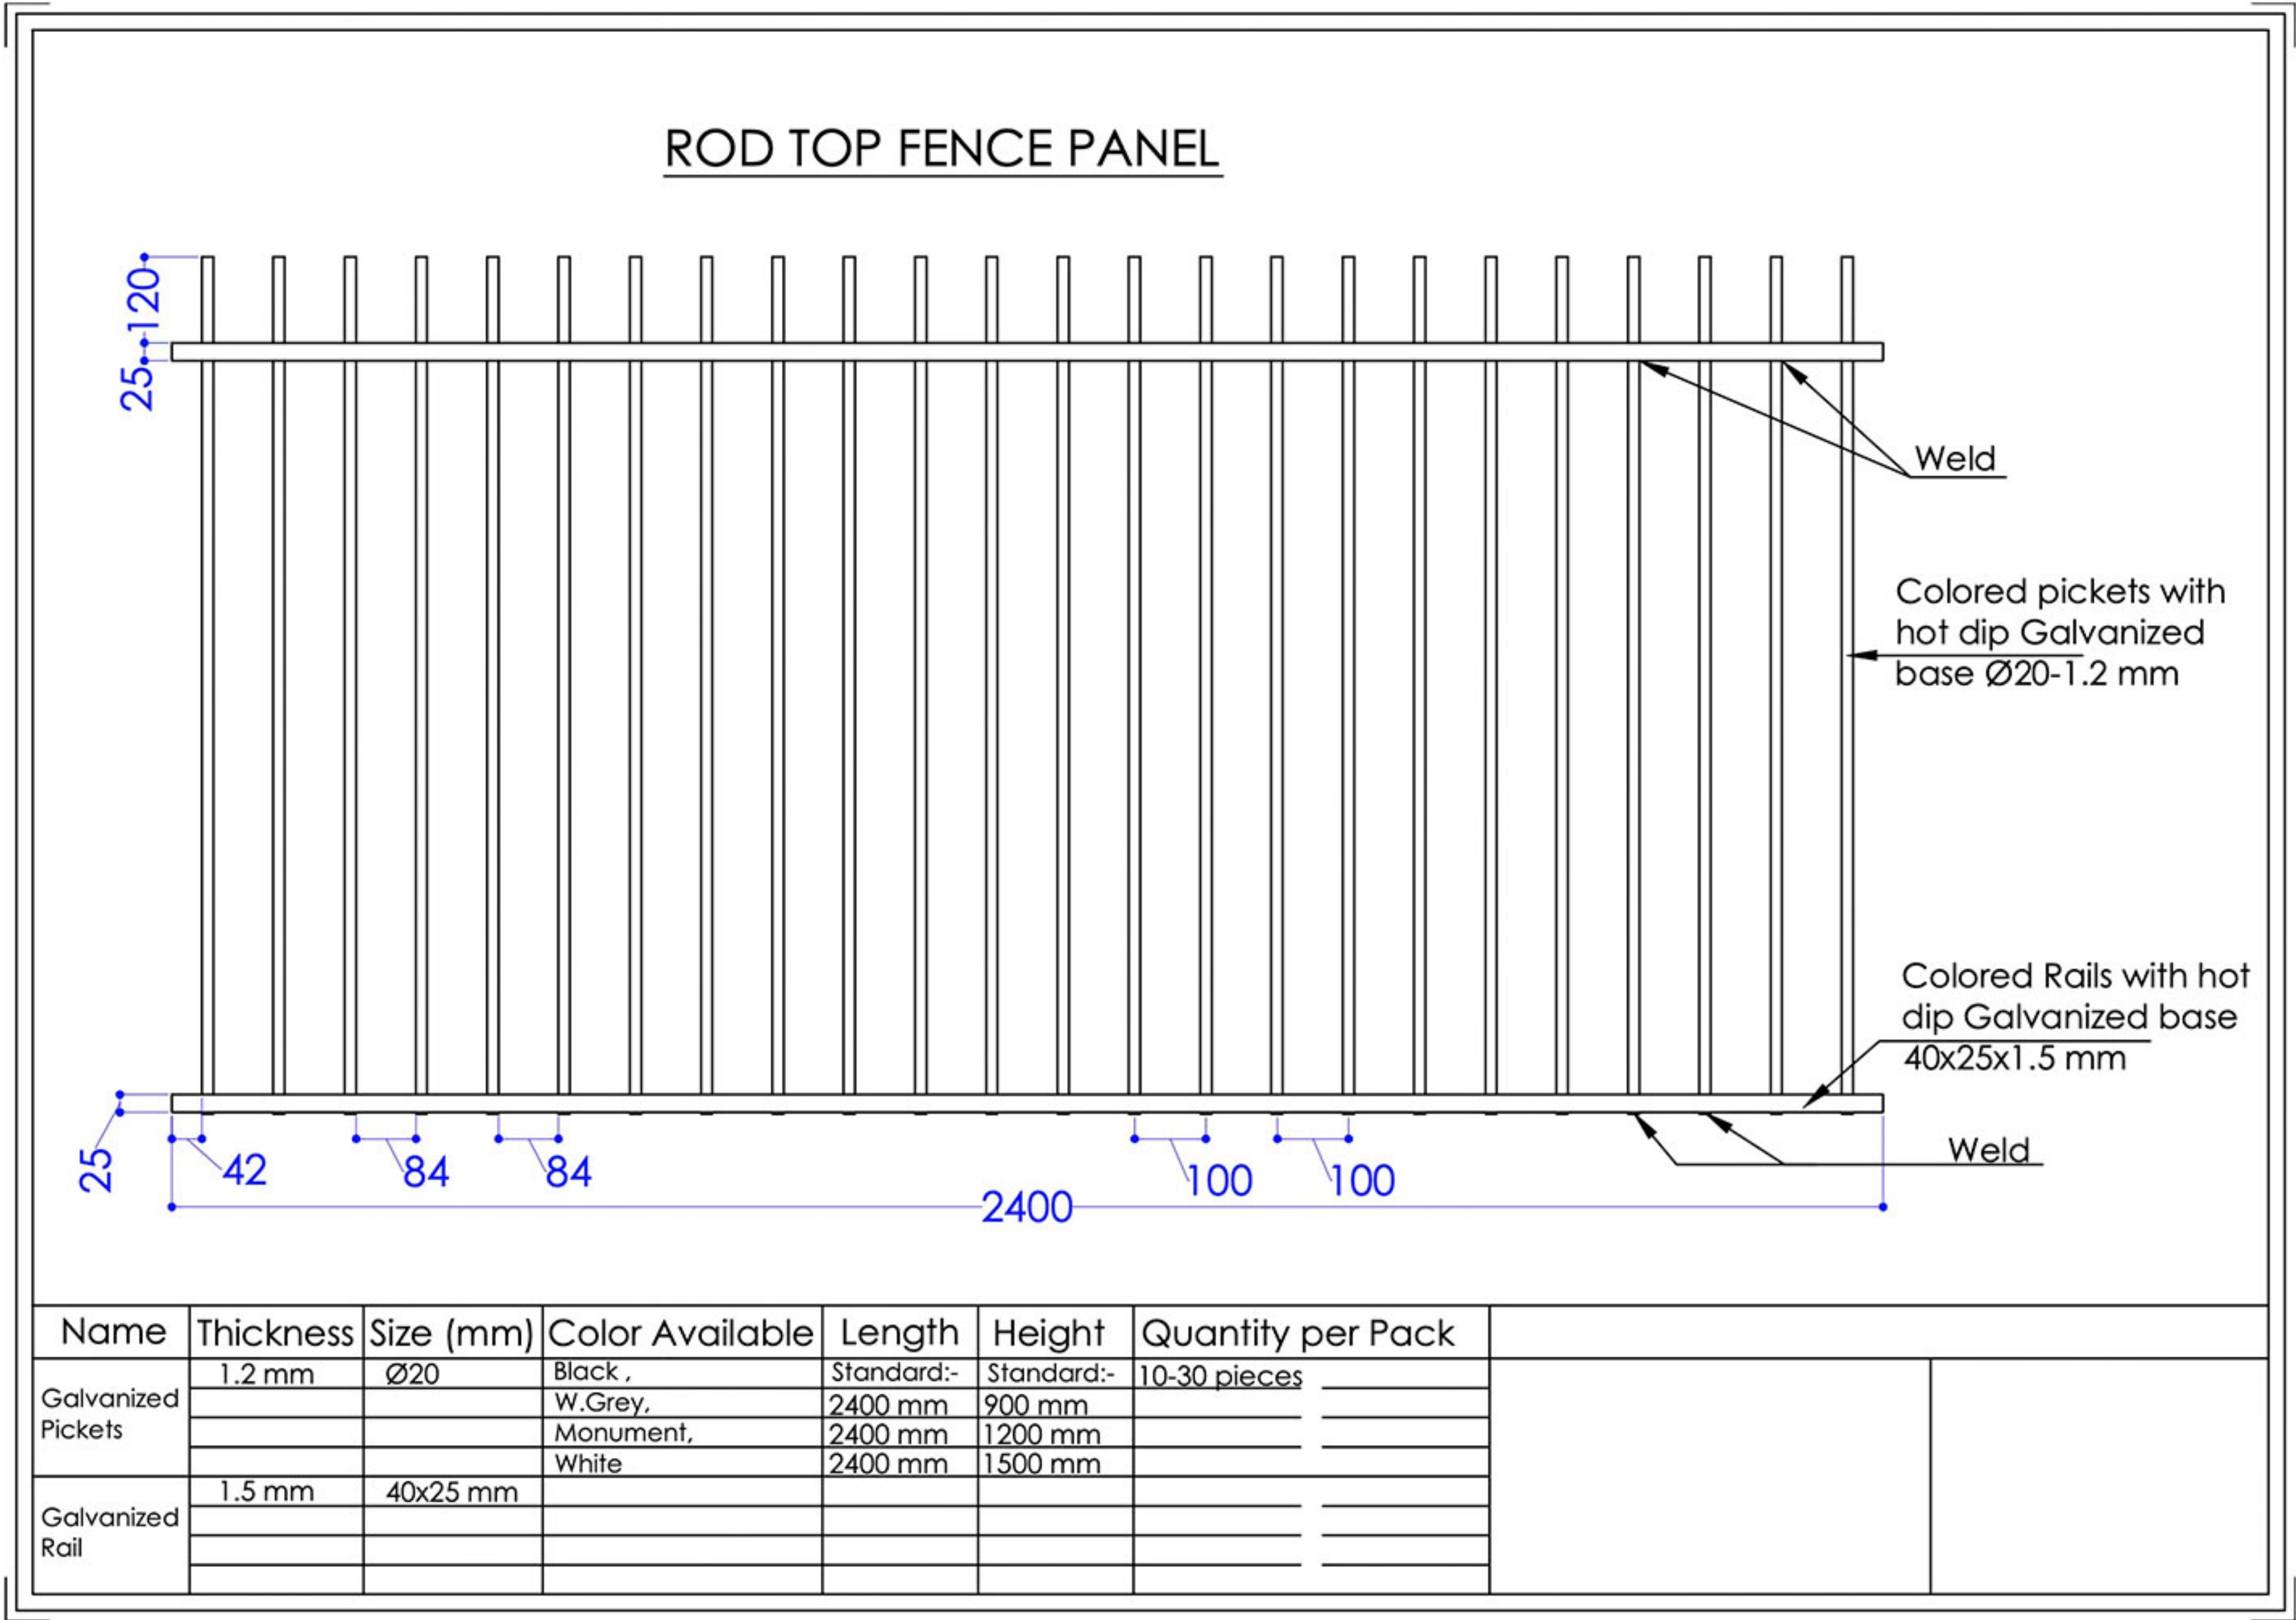

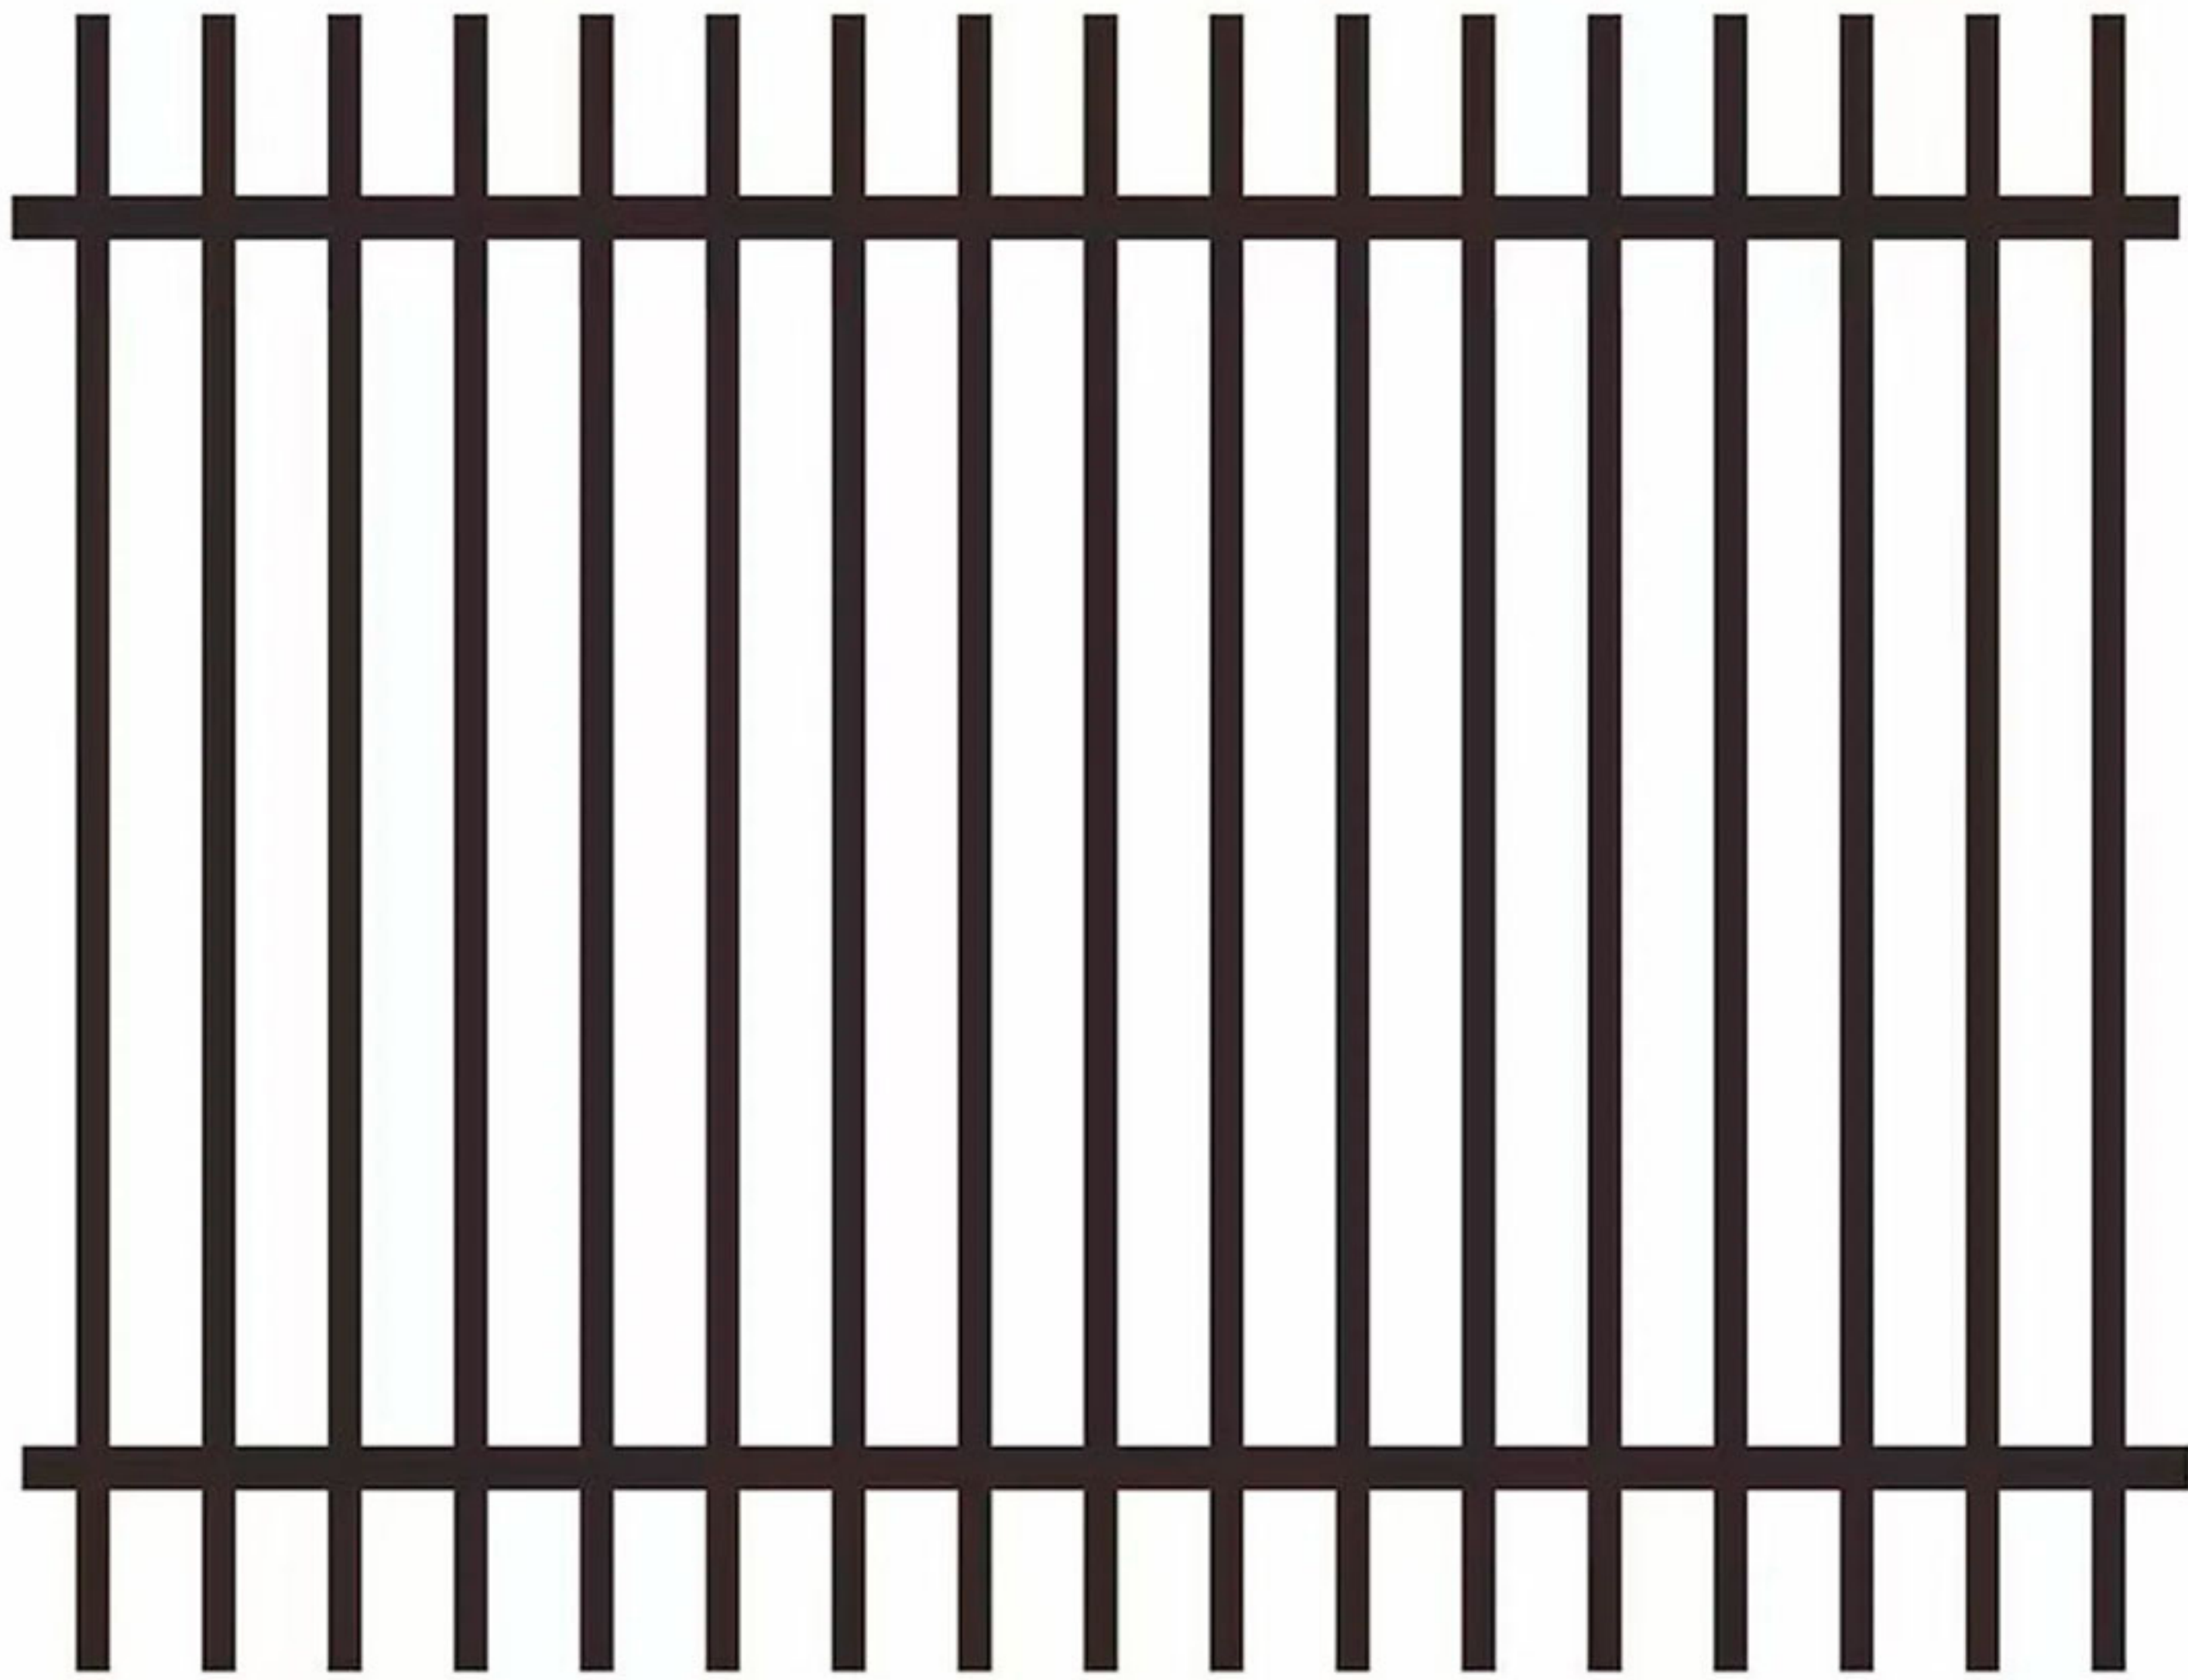

Security fencing provides an additional layer of privacy, using in conjunction with A Class building materials. it can also prevent prying eyes from seeing into your property. This is especially beneficial for residential areas, schools, and commercial properties that require extra discretion or an extra layer of security.

3. Aesthetic Appeal

Modern style security fencing such as the pedestrian panel solutions are not only functional but also aesthetically less intrusive looking.

4. Regulatory Compliance

Appropriate security measures, including fencing, are regulatory requirements for specific properties. Investing in security fence panels helps you stay compliant with local laws and regulations, avoiding potential fines and legal issues.

Fence Panels sizes

1500mm H x 2400mm W

1800mm H x 2400mm W

2100mm H x 2400mm W

2400mm H x 2300mm W
