

MOTOTRBO™ PROFESSIONAL SERIES RADIO ACCESSORIES

THE POWER OF YOUR RADIO UNLEASHED

YOUR BATTERY, SAFER, SMARTER, POWERED FOR LONGER

MOTOTRBO radios are already best in class, but to help you work at your best, you need enhancements targeted to your specific workplace. We've developed a line of accessories with unique features designed to optimize the performance of your radio in your work environment, unleashing the full power of the industry's most advanced digital radio platform.

MOTOTRBO PORTABLE RADIOS

IMPRES™ BATTERIES AND CHARGERS: YOUR BATTERY, SAFER, SMARTER, POWERED FOR LONGER

Get rid of the guesswork and get more from every battery.

Get the most out of every battery and eliminate the surprise of "low battery alerts". IMPRES chargers tell you exactly how much capacity is in an IMPRES battery before you attach it to your radio and exactly when an IMPRES battery has reached the end of service life.

Enjoy 43% longer battery life from IMPRES over non-IMPRES batteries – without spending maintenance or record keeping time and effort. With IMPRES Battery Fleet Management Software, you can check the status of 25 or 25,000 batteries at a glance, from one computer.

IMPRES™ AUDIO

Make sure every word is heard regardless of the level or direction you're speaking into the accessory. Be clearly heard the first time and eliminate repeating yourself. Whether you need to talk loudly or quietly, into or away from the accessory, IMPRES Audio lowers the loud talker level and raises the soft talker level automatically so listeners do not have to adjust the volume depending on who is talking.

Policing a busy airport, fixing equipment on a noisy production floor or assisting guests in a quiet hotel, IMPRES Audio promises a high quality communication experience.

> [Experience IMPRES Audio](#)

WINDPORTING

Communicate clearly in difficult weather. Whenever you work – in howling wind, driving rain, and severe weather – Windporting

helps you communicate effectively and listeners hear clearly.

Windporting technology eliminates the whining and howling sounds of wind blowing across your lapel/remote speaker microphone. It also prevents water from clogging the microphone for clearer transmissions.

> [Hear the difference Windporting makes](#)

INTELLIGENT AUDIO

Focus on your job instead of your radio volume. Make adjusting your radio volume based on background noise a thing of the past. Intelligent Audio listens to sounds in the background and automatically raises or lowers your radio volume so you can always hear. If you're hearing from a noisy area to a quiet place, you won't disturb others because you forgot to adjust the volume.

Intelligent Audio when complemented with IMPRES Audio takes your communications to a new level.

> [See Intelligent Audio in action](#)

OPERATIONS CRITICAL WIRELESS: YOUR RADIO, UNLEASHED

Work with your radio like never before. Place your radio on a desk or cart. In a purse, medical bag or backpack and converse seamlessly with your wireless keypad up to 30 feet away from your radio. Put your wireless PTT where you want to – on a clipboard, steering wheel or coat pocket – without wires getting in the way. Motorola Bluetooth enabled radios allow both an Operations Critical Wireless PTT and audio accessory to be connected and used at the same time. And Operations Critical Wireless accessories last up to 10 hours – up to 3 times the battery life of commercial Bluetooth® headsets.

ONLY MOTOROLA OFFERS A WEALTH OF EXCLUSIVE AUDIO FEATURES THAT ENSURE YOUR MESSAGE IS HEARD EVEN IN THE MOST DEMANDING WORK CONDITIONS

<p>IMPRES™ AUDIO: I HEAR YOU, HOWEVER YOU SPEAK</p>	<p>DUAL MICROPHONE AUDIO: I HEAR YOU, EVEN WHEN YOU CAN'T HEAR YOURSELF</p>	<p>WINDPORTING AUDIO: I HEAR YOU, NOT THE WIND</p>	<p>NOISE-CANCELING AUDIO: I HEAR YOU, NOT THE NOISE</p>	<p>INTELLIGENT AUDIO: YOUR CALLS, ALWAYS AT THE PERFECT VOLUME</p>
<p>Ensure your voice is heard clearer, crisper, and louder regardless of level or direction you're speaking into the accessory.</p>	<p>Virtually blocks out all background noise in demanding and extreme noise environments so you can always communicate clearly.</p>	<p>Reduce the effect of wind and other outdoor noises so your messages are always heard clearly.</p>	<p>Reduce the effect of background crowd and machinery noise so your messages are always heard clearly.</p>	<p>Set your volume once. Depend on your accessory to listen for changes in background noise, adjusting the volume automatically so you hear every call.</p>

MOTORBO PORTABLE RADIOS

WHAT ARE THE BENEFITS OF THE INDUSTRIAL NOISE CANCELING (INC) REMOTE SPEAKER MICROPHONE?

SUPPRESSES HIGH NOISE SO YOU HEAR CLEARLY – The dual-microphone design suppresses background noise so your message gets through. The large 1-watt speaker delivers the loudest, clearest audio available – up to 25% more than other MOTORBO RSMs.

WEAR IT WHILE YOU WORK AND COMMUNICATE FREELY – Best practices is always to speak directly into your RSM. This is especially important in high noise environments. In moderate noise environments the INC RSM allows you to clip the RSM to your shoulder or lapel and talk freely with a touch of the prominent push-to-talk button.

EASY TO CLEAN DIRT, GRIT AND DEBRIS – Debris and fine particles can clog remote speaker microphones and reduce the quality of your voice transmissions. With the INC RSM, simply vacuum out the speaker grill (when dry), then brush out the debris using soapy water, rinse and you are ready to go.

> [Experience Dual Microphone Noise Suppression](#)

WHICH MICROPHONE IS RIGHT FOR ME?

WINDPORTING – for outdoor, demanding weather, high winds, rain (keep on the shoulder or in front of your mouth).

> [Hear the Difference Windporting Makes](#)

INDUSTRIAL NOISE CANCELING (DUAL MICROPHONE NOISE SUPPRESSION) – loud, industrial, outdoor, rainy, dusty/dirty environments. To optimize its noise suppression capabilities, hold the RSM 1" directly in front of your mouth or turn your head toward the RSM on your shoulder and speak into the closest microphone on the RSM, also washable.

NOISE-CANCELING – noisy, indoor environments. To optimize its noise reduction capabilities, hold the microphone in the correct use position directly in front of your mouth, facing the source of the noise (as shown in photo).

IMPRES AUDIO (MOTOROLA EXCLUSIVE): Ensure your voice is heard clearer, crisper, and louder regardless of level or direction. You're speaking into the accessory.

INTELLIGENT AUDIO (MOTOROLA EXCLUSIVE): Set your volume once. Depend on your accessory to listen for changes in background noise, adjusting the volume automatically so you hear every call.

WINDPORTING (MOTOROLA EXCLUSIVE), NOISE CANCELING, DUAL MIC, NOISE SUPPRESSION: Windporting reduces the effect of wind and other outdoor noises

on your microphone performance and prevents water from clogging the microphone and disturbing your transmission.

Noise-Canceling microphones negate crowd or machinery noise so your voice comes through clearly and louder.

Dual Mic Noise Suppression used in the INC RSM suppresses loud background noise so your message gets through clearly.

AUDIO JACK: Connect a variety of comfortable earpiece styles to the remote speaker microphone for a more discreet communication option.

ORANGE BUTTON: This essential programmable button on top of the microphone is easily accessible. This button can also be set for any programmable feature on the radio, such as emergency.

PROGRAMMABLE BUTTON: This programmable button allows you to access key features while you keep your radio on your belt or hidden under a jacket.

VOLUME CONTROL: Conveniently access the volume control. Toggle switch allows you to easily adjust between high and low volume as needed.

IP RATING: The international standard for rating dust and water protection. The first digit represents water or moisture protection. IP54 provides protection from water sprayed from all directions. IP55 protects against driving rain, and IP57 resists submersion in 1 meter of fresh water for 30 minutes.

INTRINSIC SAFETY RATING: Motorola approved accessories are a critical part of the overall radio system certified by a recognized testing organization as intrinsically safe. Non-Motorola approved accessories may not be certified for MOTOFRBO and if used, could result in equipment that is NOT approved or unsafe in a hazardous environment.

PUBLIC SAFETY MICROPHONES Deliver the same advanced features as our Remote Speaker Microphones and also includes an antenna (purchased separately) to improve reception.

All remote speaker microphones are built with top quality materials including durable Kevlar® cables that survive tough working conditions.

MOTOTRBO PORTABLE RADIOS

HOW DOES IMPRES IMPROVE AUDIO PERFORMANCE?
 IMPRES enhances the clarity and audio quality of Motorola accessories by reducing ambient noise and improving voice intelligibility.
 If you speak quietly or normally, but not directly into a microphone, IMPRES Audio detects changes in your voice and automatically adjusts the transmitted volume so your listener won't have to adjust volume up and down.
[> Experience IMPRES audio](#)

IMPRES AUDIO (MOTOROLA EXCLUSIVE): Ensure your voice is heard clear, crisp, and louder regardless of level or direction you're speaking into the accessory.
INTELLIGENT AUDIO (MOTOROLA EXCLUSIVE): Set your volume once. Depend on your voice to detect or changes in background noise, adjusting the volume automatically so you hear every call.

MICROPHONE AND PTT: Some accessories have a microphone on the same wire as push-to-talk (2-wire surveillance kit) or on a separate wire (3-wire surveillance kit). Microphones are small, easy to mount, and hide during surveillance operations, yet powerful enough to pick up whispered transmissions and reduce ambient noise.

PROGRAMMABLE BUTTON: This programmable button allows you to access key features while you keep your radio on your belt or hidden under a jacket.

INTRINSIC SAFETY RATING: Motorola-approved accessories are a critical part of the overall radio system certified by a recognized testing organization as intrinsically safe. Non-Motorola approved accessories may not be certified for MOTOTRBO and if used, could result in equipment that is NOT approved or unsafe in a hazardous environment.

OPTIMIZED FOR DIGITAL

Make sure to only use Motorola approved and certified MOTORTRBO audio accessories, as these accessories have been optimized for performance in both digital and analog modes. You may experience chopper noise if Motorola digital approved accessories are not used.

HOW DO TEMPLE TRANSDUCERS WORK?

These headsets use temple transducers that rest on your temple to convert audio into sound vibration and transmit it to your inner ear. If you're using hearing protection or directing heavy traffic, you can hear the audio from your radio and the surrounding environment. Since the transducer sits in front of your ears, you can also wear earplugs and still hear the radio.

XBT HEAVY-DUTY WIRELESS HEADSET IN USE

It's the middle of a shift and with machinery running at full speed, your workplace is a noisy place to be. You need to communicate on your radio while still being aware of everything around you. XBT heavy-duty headsets connect wirelessly to your radio, suppressing noise for clearer communications. With patented SENS™ situational awareness technology, these headsets ensure you'll hear critical communications from co-workers in the field with you.

OPERATIONS CRITICAL WIRELESS BLUETOOTH® ACCESSORIES This portfolio is a game changer, giving you the flexibility to remove the radio from your belt and stay connected within 50 feet.

Note: SL SERIES and XPR 7000 portable radios have Bluetooth embedded in the radio and do not require a separate external adapter.

EARPEACE TYPE: Choose the right fit for your operations – a simple, low cost, discreet behind-the-ear or the rugged, high performance CommPort™ style earpiece.

MICROPHONE: The in-line microphones on the earbud earpiece is designed for general use, while the directional microphone on the CommPort™ style earpiece is ideal for noisier environments.

OPERATIONS CRITICAL/ENHANCED OPERATIONS CRITICAL: This Bluetooth® solution specifically for business features simple pairing, high quality audio and fast push-to-talk to ensure every word is transmitted. Enhanced Operations Critical Wireless has all this, plus instant pairing with just a touch of the accessory to the radio's Bluetooth adapter.

and intrinsically safe certification for hazardous environments. This means multiple workers on shifts who need grab-and-go device can all pair at the same time without connecting to the wrong radio.

MOTOTRBO PORTABLE RADIOS

HOW DO OPERATIONS CRITICAL WIRELESS ACCESSORIES HELP ME?
 They free you from being physically connected to the radio. This means a line worker can put the radio on a shelf and communicate. A receptionist can place her radio out of sight and confer unobtrusively with staff while welcoming guests. Or a sports trainer can leave the radio in a medical bag while he tends to injured athletes on the field.

KNOCKS, DROPS, SHOCKS, VIBRATION, STATIC.

If your radio gets banged on a ride, rattled by heavy equipment or shocked by static electricity, our batteries will stay true and stand tough. These rigorous lab tests prove that Motorola radio batteries perform robustly and reliably, despite the toughest conditions. What's more, we stand behind every battery we build.

See www.motorolasolutions.com/proventough for details.

PROVEN TOUGH BATTERY TESTING PASS RATE

WHAT IS THE LONG-LIFE COLD TEMPERATURE BATTERY?

The Motorola Original® Long-Life Cold Temperature Lithium Manganese battery has up to 1000 full charge/discharge cycles and is rated to withstand extreme temperatures down to -30 degrees C. Maintenance-free and lightweight, this battery does not require reconditioning or hazardous waste disposal.

HOW DO IMPRES BATTERIES AND CHARGERS SAVE MONEY?

They reduce the number of spare batteries you buy and increase the time before you need replacements. Only IMPRES batteries can be charged 150 additional times versus a standard battery – a 43% increase in charge cycles. If you charge radios two to three times a week, you'll get more than an extra year out of every IMPRES battery.

IMPRES BATTERIES AND CHARGERS: Get the most out of every battery and eliminate the surprise of "low battery alerts." IMPRES chargers tell you exactly how much capacity is in an IMPRES battery before you attach it to your radio and exactly when an IMPRES battery has reached the end of service life.

INTRINSIC SAFETY RATING: Motorola-approved batteries are a critical part of the overall radio system certified by a recognized testing organization as intrinsically safe. Non-Motorola approved batteries may not be certified for MOTORTRBO and if used, could result in equipment that is NOT approved or unsafe in a hazardous environment.

BATTERY WARRANTY: Take advantage of the longest warranty in the industry. Our warranty protects against any defects in workmanship for **four years** – twice as long as most leading competitive batteries.

MOTOTRBO MOBILE RADIOS

UNRIVALED VOICE AND DATA ON THE GO XPR 5000 SERIES

The XPR 5000 series shares the same connector as the XPR 4000 series accessories enabling easy migration. This portfolio is enhanced with integrated Bluetooth® giving more flexibility than ever before. Now your drivers can check on packages or walk around the loading dock and stay connected within 30 feet of their radio. A new INPRESS keypad microphone features a four-way navigation button that makes accessing critical features on the large color display, dialing phone numbers and sending text messages easy.

XPR 5000 SERIES

INTEGRATED VOICE AND DATA ON THE GO XPR 4000 SERIES

Handling dispatch for a delivery company or hauling freight across the country, accessories must meet challenging installation and operational requirements. XPR 4000 series mobile accessories are specifically designed for hassle-free communication in a vehicle, for dispatch-enabled communication, and for easy installation.

XPR 4000 SERIES

XPR 2500 SERIES

The XPR 2500 features a durable telco accessory connector that enables microphones, external speakers and vehicular solutions. Many of the XPR 2500 microphones feature Intelligent Audio. Intelligent Audio listens to sounds in the background and automatically raises or lowers your radio volume so you can always hear clearly. If you're driving an empty bus that quickly fills with chattering children – you will still be able to hear important communication without taking your hands off the wheel to adjust the radio volume.

XPR 2500 SERIES

MOTORTRBO MOBILE RADIOS

COMPATIBILITY		ACCESSORY		FEATURES	
MICROPHONES Keypad microphones let you easily navigate menus on your XPR 450 or XPR 550, dsl phone numbers and send text messages. The heavy-duty microphone is easy to use while wearing gloves and the telephone-style handset enables more discreet communication.

HOW CAN I COMMUNICATE SAFELY IN MY VEHICLE?

The IMPRES Visor Microphone mounts to your vehicle's visor for safe, convenient communication. Press the external push-to-talk button on the steering wheel to converse without taking your hands off the wheel or your eyes off the road. IMPRES Audio compensates for the distance of the visor mic from your mouth so that your radio communications are loud and clear.

COMPATIBILITY		ACCESSORY	
EXTERNAL PUSH-TO-TALK (PTT) Activate the PTT or emergency/footswitch without having to use the mobile microphone. A simple pushbutton PTT can be held in the hand or mounted in your vehicle for easy access, while the emergency footswitch lets you discreetly activate emergency/hands-free when a critical situation arises.

OPTIMIZED FOR DIGITAL

Make sure to only use Motorola audio accessories with this digital symbol, it indicates these accessories have been optimized for performance in both digital and analog mode. All accessories with this symbol have been certified and approved for XPR™ 2500 mobile radios.

MOTOTRBO MOBILE RADIOS

HOW DO MOBILE WIRELESS ACCESSORIES HELP ME?

Use your mobile radio like never before and freely move around your vehicle. This means a driver can sort through packages on the back of the delivery truck, a bus driver can check on students in the back of the bus, or a city worker can trim trees from a cherry picker and all can still remain connected to their mobile radio. And by removing the wired connection to a desk-top mobile, a dispatcher can walk around the office and manage calls.

COMPATIBILITY		ACCESSORY		FEATURES										
OPERATIONS CRITICAL WIRELESS BLUETOOTH® ACCESSORIES This portfolio is a game changer for your business as you have the flexibility to leave your truck or walk away from your desk and still remain connected to your radio up to 30 feet away. 		GPS/UHF Combination Antenna for the 450-470 MHz range, 5 dB Gain	PMAE4034	UHF	450-470	●	Through-hole
GPS/UHF Combination Antenna for the 403-527 MHz range, 2 dB Gain	HAEB019	UHF	403-527	●	Through-hole		
GPS/UHF Combination 1/4 Wave Antenna for the 470-527 MHz range	HAEB020	UHF	470-527	●	Through-hole		
GPS/UHF Combination Through-Hole Mount Antenna for 470-494 MHz, 3.5 dB Gain	HAEB024	UHF	470-494	●	Through-hole		
GPS/UHF Combination Through-Hole Mount Antenna, 494-512 MHz, 3 dB Gain	HAEB026	UHF	494-512	●	Through-hole		
UHF ANTENNAS (RF ONLY)							
XPR 400 SERIES	UHF Wide Area Through-Hole Mount Antenna for the 406-420 MHz range, 3.5 dB Gain, Mini-U	HAE4010	UHF	406-420		Through-hole	
XPR 500 SERIES	UHF Wide Area Through-Hole Mount Antenna for the 450-470 MHz range, 3.5 dB Gain, Mini-U	HAE4011	UHF	450-470		Through-hole	
XPR 400 SERIES	UHF Wide Area Through-Hole Mount Antenna for the 470-494 MHz range, 3.5 dB Gain	HAE4012	UHF	470-494		Through-hole	
FREQUENCY BAND: Most antennas only cover a portion of a frequency band. Our wideband UHF and VHF antennas offer coverage across the entire band, enhancing your communication flexibility.							
				INTEGRATED GPS: To support GPS capability in the radio, the GPS antenna is integrated into the RF antenna.			

COMPATIBILITY		ACCESSORY		FEATURES			
ANTENNAS		DESCRIPTION		UHF /VHF / (800/900 MHz)	FREQUENCY BAND (MHz)	INTEGRATED GPS	MOUNTING STYLE
  	  	UHF Wide Area Through-hole Mount Antenna for the 403-527 MHz range, 2dB Gain, Mini-U	HAEB022	UHF	403-527		Through-hole
		UHF Wide Area Through-Hole Mount Antenna for the 445-470 MHz range, 5 dB Gain, Mini-U (with base)	RAE400A98	UHF	445-470		Through-hole
		UHF Urban Roof Mount 1/4 Wave Antenna for the 403-430 MHz range, Mini-U	HAE4002	UHF	403-430		Roof mount
		UHF Urban Roof Mount 1/4 Wave Antenna for the 450-470 MHz range, Mini-U	HAE4003	UHF	450-470		Roof mount
		UHF Urban Roof Mount 1/4 Wave Antenna for the 470-512 MHz range, Mini-U	HAE4004	UHF	470-512		Roof mount
UHF Wide Area Roof Mount Antenna for the 494-512 MHz range, 3.5 dB Gain	HAE4013	UHF	494-512		Through-hole		
UHF Stubby Through hole Mount Antenna, 410-430 MHz	RAE4163A98	UHF	410-430		Through-hole		
UHF Stubby Through hole Mount Antenna, 430-450 MHz	RAE4164A98	UHF	430-450		Through-hole		
UHF Stubby Through hole Mount Antenna, 450-470 MHz	RAE4169A98	UHF	450-470		Through-hole		
COMBINATION GPS/VHF ANTENNAS							
GPS/VHF Combination Through-Hole Mount 1/4 wave Antenna for the 136-144 MHz range	RAD214	VHF	136-144	●	Through-hole		
GPS/VHF Combination Through-Hole Mount 1/4 wave Antenna for the 146-150.8 MHz range	RAD215	VHF	146-150.8	●	Through-hole		
GPS/VHF Through-Hole Mount 1/4 wave Antenna for the 150.8-162 MHz range	RAD216	VHF	150.8-162	●	Through-hole		
GPS/VHF Through-Hole Mount 1/4 wave Antenna for the 162-174 MHz range	RAD217	VHF	162-174	●	Through-hole		
GPS/VHF Through-Hole Mount Antenna for the 166-172 MHz range, 3 dB Gain	RAD218	VHF	166-172	●	Through-hole
