## OUR STORY

Inspired by a passion for great design and practical utility, LUMIRA is the brainchild of Sydney-based designer and entrepreneur, Almira Armstrong.

Pre-LUMIRA, Armstrong's background in PR and marketing saw her relocate to live and work in London, Los Angeles and New York. The cities themselves certainly proved inspiring, however also provided convenient bases to indulge in another great passion — travel. In dedication to the artisan studios and workshops of Europe to which she owes her own lineage, LUMIRA was born:

“For me, luxury is not about price or exclusivity. At the core of true luxury lies a passion for creating well designed products of exceptional quality, as well as a commitment to never compromise these values.”

LUMIRA fragrances are undeniably luxurious, defined not only by the quality of their ingredients, the meticulous attention to detail applied in production but, most importantly, the memories they evoke.

## CANDLE CARE

To ensure an even and smoke-free burn, the wick should be trimmed to a length of 5mm each time before lighting. Candles should never be left burning unattended and discontinued when 10mm of wax remains.

### GET THE MOST OUT OF YOUR LUMIRA CANDLE

In order to get the most out of your LUMIRA candle, burn it until the entire surface of the candle melts.

- To preserve the fragrance, do not burn your candle for more than 4 hours at a time.
- Do not leave candle burning unattended. Keep away from children, curtains and pets.
- Should the wick require centering, gently readjust to correct position when the wax is still molten. Allow candle to solidify before relighting.
- For a clean burn, trim the wick to 5mm at each time.
- Always protect the table or surface on which the candle rests.
- Do not burn your candle all the way down. Always leave at least 10mm of non-molten wax at the bottom.
