The Big Book of Knitted Monsters: Mischievous, Lovable Toys by Rebecca Danger

Monsters can be lovable, cute, and cuddly—at least they are in this fun book from Rebecca Danger. The stuffed monster toys that you can create with her patterns are sure to delight children of all ages. The patterns are fairly simple, yet offer terrific opportunities to learn new skills, like knitting with double-point needles, picking up stitches in the middle of a knitted fabric, and shaping with increases and decreases. These adorable toys are a clever way to use up odd skeins of yarn in your stash. Make them now and have them ready to give as holiday gifts! From Martingale.

It works up quickly on size US 11 knitting needles and feels great as it moves through your fingers. Find a pattern, choose a color, and cast on!

More Than a Dozen Hats & Beanies by Carri Hammett

Hats can keep you warm and, if it's the right look, cool at the same time. These 15 hip projects will do just that by letting you create hats that are both cozy and stylish. Carri Hammett offers something here for everyone, from a colorful earflap hat for men to a sweet cable hugs-and-kisses hat for kids. There are many possibilities in between, with slip-stitch color-work patterns and more. This is a great book for beginning knitters who would like to try something new. From Annie's.

It's a green product that operates without batteries, is fabric-friendly, and has three blades to work well on a variety of fabrics. With its ergonomic handle, you can use the Gleener comfortably for years to come. It will help bring your hand-knit creations back to life! Learn more at www.gleener.com.
