

Bamboo Tranquility Launches High-performance Bacteria Resistant Bedding

FOR IMMEDIATE RELEASE

Irvine, CA - Sleep specialists Bamboo Tranquility launches Kickstarter campaign to fund their hybrid bamboo bedding

On 21st July 2017, Bamboo Tranquility launched a crowdfunding campaign to raise funds for a range of anti-microbial bedding, sheets and pillowcases. Designed as an eco-friendly alternative to cotton, this is a collection of bedding that is twice as soft and free from harmful chemicals.

Regular linen bedding is popular but has major drawbacks from getting too wrinkly, being scratchy and can retain germs. Bamboo Tranquility duvets work by using natural flax linen with bamboo fibers, whilst the sheets are made from 100% bamboo. Bamboo fabric has the benefits of being naturally hypoallergenic and durable, so that can hold up to years of use.

"I first experienced bamboo bed sheets when sleeping over at a friend's house. The sheets were so high quality and comfortable that I felt a noticeable difference in my quality of sleep and comfort" said Milovan Simic, President of Bamboo Tranquility. "Our bedding has been featured on Elle Decor and The Huffington Post and the benefits is that it's thermal regulating, incredibly soft, resists odor and bacteria - making it a perfect partner for linen".

The Bamboo Tranquility duvet cover is available in Queen/Full measuring 88" wide x 92" long and King/Cal King sizes measuring 108" x 92" long. Each duvet has inner corner ties to secure the comforter and a hidden button enclosure.

The Kickstarter campaign is looking to raise \$10,000 by 20th August 2017. Perks include a special price of \$169 for a Bamboo Tranquility duvet cover which includes a duvet cover, 2 pillowcases and a reusable linen bag.
