MATERIAL QUARTZ

No one knows quartz like we do. It's what we've been doing for 30 years. The hardest part of granite, quartz forms around 80% of the raw material used in our composite sinks. You can see why they are the toughest around. We mould quartz with high-grade acrylic resin using a special computer-controlled casting process. The result is a hardened composite material that is resistant to scratches, dents, stains, heat and cracks. That's why our composite quartz sinks last the distance.
