# Welcome to our Product Catalog

From the most traditional to the more modern styles

A well-established business operating in the United States, CFP Cabinets is proud to supply and serve the nationwide demand for high quality kitchen and bathroom cabinets. With more than 60,000 square feet of space comprising a showroom and distribution centre, we look forward to providing dealers and businesses with the best service to persevere in this industry and bring professionalism, quality and satisfaction to your homes.

We are passionate about building and developing solid relationships, so our organization and operation is built on mutual respect and appreciation.

Great products and prices aside, we pride ourselves on offering the best customer service and support in the industry. Our expert team is dedicated to solving any problem or request in a short time.

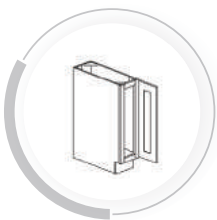

We stand ready to collaborate businesses that value and define quality, remarkable and connected service to raise cabinet standards across America.

# WE CARE

Small parts and minimal details are mostly disregarded or overlooked essentially on the grounds that they are not obvious from an external perspective. Such little surfaces or details are crucially significant for the installers or the end-clients of our cabinets. Those small segments or details might be out of your sight; however, they are never out of Cabinet's mind. We realize they will cause an unfavorable impact on installers and end-users.

## WALL CABINETS

# DOVETAIL CONSTRUCTION

The dovetail construction process involves plywood side panels to perfectly interlock with a solid wood face frame through corresponding dovetail grooves. This highly resilient technique ensures that our cabinet lines are strong, secure, and long-lasting.

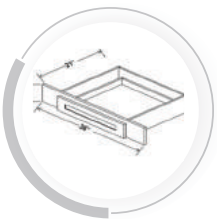

# FLUSH FIT FRAMES

All together for a cabinet to be a high-end quality product, a cabinet must have a flush inner frame that provides an appealing appearance while giving added dimension to the internal area. Cabinet lines display prime craftsmanship with their flat surface top and bottom interior planes, which result in practical and pragmatic use.
