

## Fibre Optic Wall Mounted Patch Boxes MM/SM

Our fibre wall boxes are ideal for use where a rack mounted patch panel isn't suitable. They can be fixed to walls, under desks or floors and are especially suited where space is at a premium or only a low fibre core count is required.

The fibre termination compartment is covered by a lid which is fixed with one screw for quick installation. The wall boxes can be supplied fully loaded with adaptors, partially loaded or unloaded. The adaptor ports are numbered for ease of identification with space below for write on labels if required. Any unused ports are filled with blanks. There are 20mm knock outs on three sides allowing maximum flexibility for cable entry. All boxes are supplied with 1 x PG11 gland and 4 x stick on bunny clips.

- Finish - RAL 7035 Semi-gloss
- Material - 1.2mm Mild Steel
- Cable knockouts on three sides
