

Matrix Fibre Splice Cassette – HD Tray™

Matrix HD Tray™ is a high density fibre splice cassette designed to fit in the Matrix GigaPatch™ splice cabinet system. Currently the cassette is widely used and approved in major mobile networks and will also fit and retain full functionality in previously installed cabinets from Huber and Suhner and Splice. Given its low cost, ease of installation, quality and performance the Matrix HD Tray™ is leading the way through innovation and design.

The cassette is supplied with 24 LC,24/36 MU or 16 SC connections and splice protectors in a small footprint. The runner system allows for full protection and access to fibres whilst the hinging system gives quick and easy access to the cassette in the case of repair or re-routing.

Dimension (mm) approx.	200 x 260 x 17
Weight incl. (empty)	0.3KG
Material	ABS/PC Halogen free and flame-retardant (UL94 V-0)
Colour	Grey/Yellow

Matrix HD Tray™ features Pigtail and Fibre separation through the use of both sides of the cassette, excess fibre management and fully managed fibre bend radius throughout. The tray is designed to meet network requirements and includes a patented splice protection block for up to 36 splices, along with a position for mounting Matrix GigaSplit™ splitters. Each cassette has a clear lid for further protection and labelling and a full supply of labels are included in the package.

Used alongside the Matrix GigaDuct™ ducting and the Matrix HD GIGAPATCH Splice Cabinet ODF™, this new product can benefit all within the telecoms sector by providing an efficient solution to growing capacity problems within the industry.

CBN offers a complete package and can recommend approved installation contractors for site survey, installation and commissioning if required.
