# MOUNTING GUIDES

## INSTALLATION INSTRUCTION

**Step 1:** Make sure of all the power is off before installing. Remove the one ceiling tile that you need to install light fixture on. Then place the light fixture on the T-bar carefully and make sure it is correctly in place and secure.

**Step 2:** Lift the 4 buckles on the back of the panel up by 90° then bend the top part of the buckles 90° towards the direction where you can anchor the light fixture to the T-bar.

**Step 3:** Place the driver on top of the lighting fixture in the back. Connect the cable between the driver and the lighting fixture. Open the driver's junction box and connect the AC wire to the driver correctly (L=black & N=white)

### Notice:

1. Please make sure the power is off before installation (this installation can only be done by certified electricians).
2. Adjust the wattage and kelvin to your desired setting on the driver.
3. Product rated voltage is 100-277 Volts. Please make sure voltage range meets the requirements
4. Please make sure the driver on the back of the fixture is not covered by anything such as construction foam in case the driver overheats.
4. Please don't use chemicals to clean the lighting surface.
