

HANDHELD ANSER U2 PRO-S 1/2"

THERMAL INKJET PRINTER

HANDHELD PRINTING SOLUTION

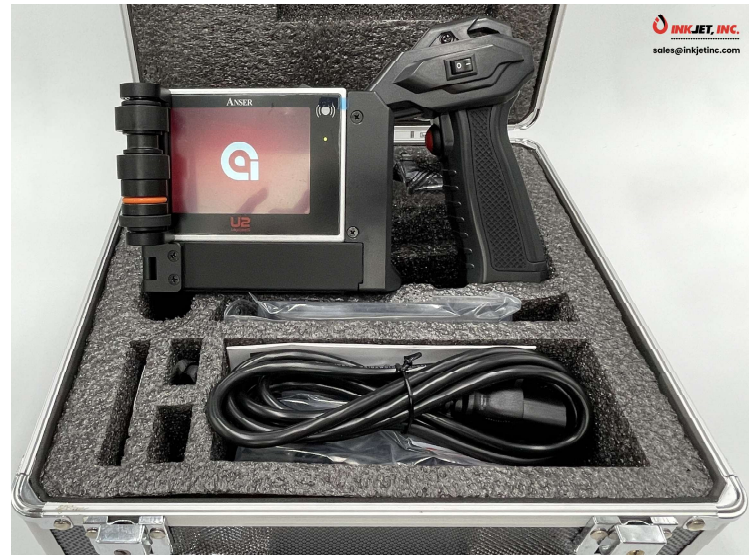

If you are in the market for a highly portable printer that doesn't sacrifice coding functionality, the Handheld Anser U2 Pro-S 1/2" (TIJ) printer is the solution for you. This printer comes with a built-in encoder that allows for perfect print with contact to both porous and non-porous objects.

INK VERSATILITY

The Pro-S Mobile unit can utilize our entire portfolio of Anser based cartridge inks which include top of line options for substrates such as cardboard, plastic, metals, and even glass. Uniquely positioned within the thermal inkjet market (TIJ), InkJet even offers blue, red, yellow, white, and of course black color options. Speak with your coding and marking expert today to get the best advice on what ink best suits your specific application at 800-280-3245.

REWORK AND SPARE SOLUTION

Ever have a box or product miss a code during your production? Well instead of breaking down a pallet to bring back to your line for a reprint, why not use a handheld solution to quickly fix the missed code! Many customers also find that their extra handheld solution for rework becomes the perfect back-up if anything happens to their primary unit, which avoids the dreaded production down-time.
