For all the beautiful moments in your garden...

Garden houses are both pretty and practical. Throughout the year, you may use it to protect your garden furniture against the elements and humidity. It may also give shelter to the tender plants that would not otherwise withstand sustained cold. Hence, besides being a cosy getaway, a garden house may be used as a storage room as well.

Garden houses are mostly manufactured from timber – this is a natural material that will harmonise with any garden setting. There are garden houses in various shapes and sizes – from simple small cabins without Window with an area of about a square metre to houses with large Door and Window and several rooms. If you use your garden house for lodging or as a holiday home, or if you wish to hold a party there, the house can be supplied with electrical and water supply connections.

Tene Kaubandus OÜ was established in 1999. We produce garden houses and garden accessories from high quality timber of northern spruce.

During the years, the production volumes of Tene Kaubandus have increased. Today, we produce 12,000 to 15,000 garden houses in a year. Our product line includes garden houses, saunas, playhouses for children, gazebos and garages with the wall thicknesses of 28mm, 40mm and 70mm. We ensure high quality with well-considered elements, such as:

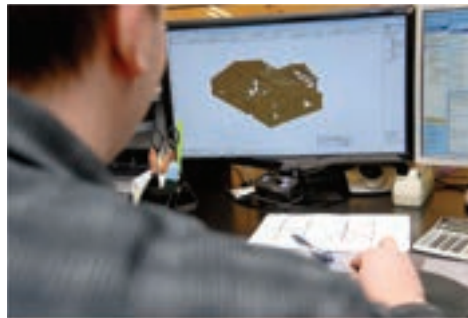

- Wind-resistant corner joints
- Door and Window from glued timber are glazed with real glass, and have tilt-and-turn openings.
- 70mm houses have double-glazed Door and Window, seals and aluminium water drips.
- All the houses have impregnated foundation beams.
- 40mm and thicker wall boards are double-grooved.
- Skirting and floor boards cut to match the design are included.
- All the models have storm bars, corner joints of 70mm houses have metal support bars.
- All the houses are complete with an assembly kit and a thorough installation manual.

The products are manufactured from high quality raw materials using the state-of-the-art technology and most contemporary machinery. Our primary aim is to manufacture perfect garden houses and ensure their accurate and timely delivery to our clients.

We have produced various houses for diverse applications to the custom designs of our clients, thus we have experience and know-how for more sophisticated projects. You may find some of them in our catalogue as well. We will ensure you that your order will be fulfilled in the best possible way.

Thank you for your interest in our products.

Riho Reesar
The owner of the company

Pour tous les bons moments dans votre jardin...

Les maisons de jardins sont belles et pratiques. Tout au long de l'année, vous pouvez l'utiliser pour protéger votre mobilier de jardin contre les éléments et l'humidité. Elles peuvent également abriter les plantes fragiles qui, autrement, ne pourraient résister à un froid persistant. Par conséquent, en plus d'être une maison confortable, une maison de jardin peut également être utilisée comme un entrepôt.

Les maisons de jardins sont en général construites en bois – c'est un matériau naturel qui s'harmonisera avec tous les agencements de jardins. Il y a des maisons de jardin de toutes tailles et de toutes formes – depuis la simple cabane sans fenêtre d'une surface d'environ un mètre carré aux maisons avec de grandes portes et fenêtres et plusieurs chambres. Si vous utilisez votre maison de jardin pour y habiter ou comme maison de vacance, ou si vous voulez y célébrer une fête, la maison peut être équipée de raccordements électriques et d'eau.

Tene Kaubandus OÜ a été fondée en 1999. Nous produisons des maisons de jardin et des accessoires de jardin à partir d'un bois de grande qualité d'épicéa nordique.

Au cours des années, la production de Tene Kaubandus a augmenté. Aujourd'hui nous produisons entre 12'000 15'000 maisons de jardin par année. Notre ligne de produit comprend des maisons de jardin, des saunas, des maisonnettes pour enfants, des gloriottes et garages avec une épaisseur de mur de 28mm, 40 mm et 70 mm. Nous garantissons une grande qualité avec des éléments reconnus comme:

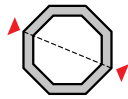

- les joints d'angle résistants aux vents
- toutes les portes et fenêtres en bois collé sont à vitrage en verre véritable et à ouverture pivotante et basculante.
- les maisons à partir de 70 mm ont des portes et fenêtres à double vitrage, joints et jets d'eau en aluminium
- toutes les maisons ont des poutres de fondation imprégnées
- les planches de murs de 40mm et plus sont doublement bouvetées
- les plinthes et les planchers coupés pour s'adapter au design sont inclus
- toutes les maisons ont des barres anti-tempête (storm bars), les joints d'angle des maisons de 70 mm ont des barres de support métalliques.
- Toutes les maisons ont un kit de montage complet et un manuel d'installation détaillé.

Les produits sont fabriqués avec des matières premières de grande qualité en utilisant une technologie de pointe et les machines les plus modernes. Notre premier objectif est de fabriquer des maisons de jardin parfaites et de garantir une livraison conforme et dans les délais à nos clients.

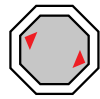

Nous avons produit différentes maisons pour des applications variées selon les designs particuliers de nos clients, c'est pourquoi nous avons l'expérience et le savoir-faire nécessaire pour les projets les plus sophistiqués. Vous pouvez également en trouver quelques-uns dans notre catalogue. Nous vous garantissons que votre commande sera exécutée de la meilleure des manières possible.

Nous vous remercions de votre intérêt pour nos produits.
