Instructions

1. Daily cleaning should be done with vacuum cleaner or broom. The frequency of floor cleaning depends on the wear of the floor.
2. Natural Soap must be shaken carefully before use.
3. Mix 125 ml(0.5 cup) Natural Soap into 5 l(1.3 Gallons) of lukewarm water. It is recommended always to work with 2 buckets: one with soap water and one with rinsing water. Clean the floor with minimum quantity of water – leave soap water on floor briefly in order to dissolve dirt. Remove dirty soap water with hard-wrung mop or cloth and rinse out in bucket with rinsing water.
4. Always wipe floor with soap water on hard-wrung mop or cloth in order to re-establish the protective Natural Soap film

For cleaning and maintenance on smaller areas you can also use premixed, ready-to-use WOCA Intensive Cleaner Spray, WOCA Natural Soap Spray, and WOCA Spot Remover.
