About Modular Closets

In 2015, Modular Closets began production of the product that made the Modular Closet possible - our closet modules. Using our modules, homeowners can achieve a truly customized look for a fraction of the price of a standard closet. The simplicity of our modules makes them ridiculously easy to assemble and install, and the assembly process is similar for all modules. All structural parts include pre-drilled holes, and with our simple, user-friendly cam lock systems, most modules can be assembled with nothing more than a Philips screwdriver.
