RELEASE LINER

SAMPLE BOOK

Leading manufacturer
in Thailand

WWW.THAIKK.CO.TH

Product Introduction

With over 45 years of experience in the production of silicone coated paper and film. We use modern production technology. There is continuous research and product development make us the market leader in this business.

By our silicone coated paper and film, there are various types according to the needs of customers such as electronics, medical, adhesive tapes, stickers, graphic works, etc.

Two varieties of Release Liners are offered

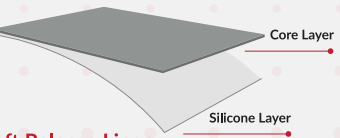

1 Single-Sided Coated

A single side decorated a liner safeguards the paper surface to which the adhesive is applied. These liners serve primarily to facilitate the adhesive's transport throughout the manual or automated bonding procedure.

2 Double-Sided Coated

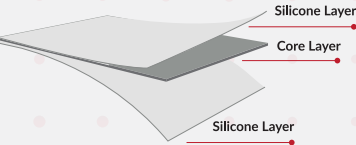

Alternatively referred to as separate release liner. Both surfaces are coated with a release coating in order to impart distinct release values to the adhesive that is applied to each surface.

Single-Sided Coated

- **Kraft Release Liner**
Unbleached kraft and Yellow paper is colorful look, Provide for automatic dispensing and manual applications
- **Woodfree Release Liner**
White release paper are good lay flay characteristics and suitable for a variety of adhesives
- **Glassine Release Liner**
Super calendered uncoated papers are the standard in commudity and variable markets
- **Film Release Liner**
The potential for a 'no-label' look of the attractive qualities of filmic liners. Durable and Superior dispensing

Double-Sided Coated

- **Kraft Release Liner**
Unbleached kraft paper is environmental friendly look. Being siliconized both sides
- **Glassine Release Liner**
High quality product with silicone coated both sides, a non-stick silicone coating
