ABOUT THAI KK

Our Mission is to deliver a **WOW** product & customer experience by creating walking innovations, sustainable, lifestyle products that fits your everyday needs. Thai KK Group focuses on proactive approach to product high-quality products, with global certifications, to serve the global demands in all industries.

Thai KK Industry Company Limited - with **40 years** of experience in manufacturing high-quality adhesive tapes, we are able to innovate new products that fits all types of applications.

1978 — **Thai KK Industry Co., Ltd.** was established in 1978. It originally started to operate in the domestic market. With the adoption of conglomerate strategies and new market shares from export sales, Thai KK has transformed to a multinational company in recent times.

2012 — Thai KK is a market leader in **Label Industry, Adhesive Tapes, Melamine and Urea moulding compounds.** The plant is situated on 60 rai of land (88,000 M2), with about 500 employees in year 2015.

2019 — Thai KK is a **market leader** in Label Industry, Adhesive Tapes, Melamine and Urea Moulding compounds.

DIGITAL LABELING
SOLUTIONS _____

We are the leading labeling solutions and sticker manufacturer in Thailand.

With our 40 years of experience, we produce high quality products at reasonable prices. We are able to gain the trust of customers both domestically and internationally around the world with continuous quality management.

Thai KK offers a wide variety of digital labelling solutions at exceptional speed, high flexibility for volume, and customization. Digital printing has opened the doors for more customer-centric business models to take-off - by making it easier to provide personalized printing, specialty enhancements and technology-enabled packaging solutions to help brands differentiate themselves.

Our digital product portfolio is suitable for a wide variety of printing technologies - from Konica Minolta, HP, Ricoh, Canon, Fujifilm, Epson, etc. The portfolio includes product from Paper, PP, PET labels (glossy, matte, transparent, pearlize, etc). **One of our newest development includes Gold, Silver, Halogram Stickers which can be used in removable and high tack applications (such as hotmelt applications).**

Application areas:
• Print on Demand
• UV inkjet, water-based inkjet, dry toner, etc.
• Mass customization

Key Features:
• High printing quality, at Low MOQ
• High performance with competitive cost benefits
• Variety of adhesives for customized applications
• Support for all different printing technologies and brands

WHAT IS HOTMELT ADHESIVE

Hot melt labels are widely used in industries labeling systems and automatic packaging systems on production lines such as the food and beverage industry, electronics industry, automotive parts industry, printing packaging industry, consumer products, etc.

PSA Hot melt adhesive is **constructed of high quality synthetic rubber with a 100% solid component**. They have excellent moisture resistance, cold temperature performance and high adhesion to difficult Low Surface Energy (LSE) and textured substrates. Which advanced production technology. As a result, quality control is consistent and accurate, and can also **reduce the carbon footprint** in the label production process up to 50% compared to the conventional adhesive production process. Hot melt adhesives are therefore **environmentally friendly** and a sustainable approach to doing business with an environmental consciousness(Sustainability) alongside the label industry and their use. They provide excellent moisture resistance, cold temperature performance and high adhesion to difficult Low Surface Energy (LSE) and textured substrates.

Additionally, In terms of hot melt adhesive properties that are both toughness adhesion and resistance to a variety of operating environments, such as corrugated boxes made from recycled pulp, non-polar plastics that are typically difficult to stick, rough surfaces, moisture resistant, resistant to use in cold areas. PSA hot melt labels is suitable for a wide range of applications on various types of packaging including food and beverage label, household label, pharmaceutical label and most importantly, **hot melt label is suitable for use in workgroups chill food packaging, frozen food at cold temperatures (-40 degrees Celsius)**

ECO FRIENDLY

COLD TEMP & MOISTURE RESISTANCE

GOOD APPLY ON ROUGH SURFACE

ECO-FRIENDLY RAW MATERIAL

REDUCE CARBON FOOTPRINT

—— OUR NEW **HOT MELT ADHESIVE MACHINE** ——

HOTMELT ADHESIVE
ADVANTAGE

Excellent performance in chill temperatures with superior moisture resistance

Product labeling applications are appropriate for a wide range of substrates, including HDPE, cardboard, and rough surfaces

Environmentally friendly because it contains no solvents (100% solid) = Sustainability Reduce Carbon footprint

Setting and processing are not complicated / Low energy consumption = Energy Saving

High process technology which highly accuracy

Deep Freeze -40°C

ADHESIVE TAPE

FOR WIDE VARIETY OF APPLICATIONS

THAIKK GROUP

Thai KK Industry Company Limited - with 40 years of experience in manufacturing high-quality adhesive tapes, we are able to innovate new products that fits all types of applications.

TECHNOLOGY OVERVIEW

MACHINE

was established in 1978. It originally stransformed to a multinational company in recent times.

ADHESIVE

Emulsion/Solvent/Hotmelt
We can formulate various pressure sensitive adhesive technologies that enable converters and end-users to easily meet those customer demands.

AROMATIC SOLVENT RECOVERY

Our systems use the process of distillation which separates volatile and nonvolatile solutions in adhesive solvent.

SEMI-AUTOMATIC SLITTING

To convert and package the widest possible range of materials of any single machine available on the market today.

QUALITY OVERVIEW & SYSTEMS

ISO 9001:2015
International quality assurance system assures its products and services are at a high quality standard for our customers.

ROHS
Restrictions of Hazardous Substances, The original RoHS, restricts the use of six hazardous materials found in electrical and electronic products.

TIS STANDARDS
มอก. 386-2531
Certified pressure-sensitive adhesive tapes for electrical purposes, operating temperature between 0 to 80 degree celcius.

UL CERTIFICATIONS
At Thai KK, we offer a complete product range for UL certified adhesive tapes. Our adhesive tapes have high technical and quality performances for electrical Insulation safety.

	65 ±3	60 mm.	72 mm.				< 40 kgs.

- **Jumbo size : 1610mm x 6000M**
- **OEM : Available on request**

Applications

High performance tape with high tensile strength film.

Suitable for a variety of surfaces applications involving hard-to stick surfaces (recycled corrugated with polyethylene coating). Applicable for heavy duty shipping, frozen food export, and for sealing product that requires moisture resistance.

Maximum weight

< 35 kgs.   < 40 kgs.

THAIKK GROUP

Bag Sealing Tape

OST-C

Color
- ● Red
- ○ White

General Property

- ✔ Surface: Bi Oriented Polypropylene Film
- ✔ Adhesive: Hot-melt Adhesive for Plastic sealing
- ✔ Suitable for room temperature and for Cold Temp with humidity
- ✔ Full range of bag and film sealing solutions (bakery)

Adhesive Hot-melt

Product Details

Type	Thickness (Microns)	Product Image Width (mm)			Length (YD)	Core ID (Inch)	Box (Rolls)	Capacity Load (kgs)
KK Gray	48 ±2	9 mm.	12 mm.	15 mm.	50	3"	384 Rolls	< 1 kgs.

- ● **Small size : On request**
- ● **OEM : Available on request**

Applications

Suitable for plastic bag sealing for bakery, department stores, shopping malls, or supermarkets, for classifying packaging for customers. Also applicable for handcraft decorations, 5S board, etc.

Maximum weight

< 1 kgs.

Kraft Tape

KTE

Color ⬤ Natual Brown

General Property

✔ Surface: Premium Brown PE Kraft Release Paper
✔ Adhesive: Solvent base Rubber Adhesive
✔ Suitable for use in Room Temperature and Cold Temp (-20°C)
✔ Excellent moisture resistance, good adhesion but can be easy to tear like paper

❄ **Cold Temp -20°C**

Adhesive Rubber

THAIKK GROUP

Technology
OVERVIEW

HISTORY
Thai KK has been the acknowledged pioneer in Thailand for the manufacturing of melamine and urea molding compound, through the technical transference from Daiwa Co., Ltd. Japan.

QUALITY CHECK
The quality of our melamine and urea molding compound and glazing powder can be guaranteed by both physical and chemical QC processes.

COLOR LAB TEST
by Color spectrophotometer
We measure color values every lot, the products must have less than 1.0 deltaE (L.a.b) when compared with color standards.

COLOR MATCHING
We have several types of pantone and use standard color boxes for color matching.

Lifestyle Solutions

We are the leading raw material supplier of consumer and industrial products

Quality

COMPANY
PROFILE

Thai KK Tech Co., Ltd. was established in 2015 is a joint venture between Thai KK Industry Co., Ltd. and E.P.C. Corporation Co., Ltd.

From the beginning to nowadays we has experienced in these fields of business and constantly attended to the research and development focusing in the printed electronic technology which meets with the customer requirement as well.

Our main goal is become the leading company in smart label and printed electronic business.

Flex Light
Raw Materail

Packaging
Luxury Box
QUALITY
OVERVIEW

Flex light is a kind of electrical device. Produced by Print electronics method, which is considered one of the modern methods of producing electronic products. Including using raw materials, which are special types of ink that can be printed

The printing process is carried out in a standardized and organized control room. The flex light sheets produced are QA checked for light luminance, encapsulation efficiency or moisture resistance. Including the power consumption rate which must be within the specified standards

ILLUMINATION TEST

ENERGY CONSUMPTION RATE

IMPACT TEST

WATERPROOF TEST
WHY FLEX LIGHT?

Lightweight and Thin shape

Flexibility
Can be applied to a flat or curved surface

Various Shapes
Produced in flat sheets or various shapes

Works in all sorts of environment and temperature

Low power consumption
Consumes less electricity

AVERAGE SERVICE LIFE
8,000 HOURS
*Depending on the environment

Electroluminescent (EL)
or Flex light

is a flexible sheet coated with EL material which is an optical phenomenon and electrical phenomenon in which a material emits light in response to the passage of an electric current or to a strong electric field.

THAI KK

WHAT IS
FLEX LIGHT?

Flex light is Electroluminescent Panels Commonly called EL Panels, or EL Sheets are thin and flexible nature, which allows them to be mounted in numerous locations, even curved surfaces.

All EL Panels (also called Light Panels, Luminescent Panels) are a Filmic thin laminated panels made from the element Phosphor that has a great glow when an electrical current AND high frequency passes.

In order to light up, every EL Panel requires an inverter to operate. The inverter sends a proper voltage and frequency throughout the panel which illuminates it beautifully and evenly.

Each inverter is rated for a specific square inch range, which is calculated by taking the TOTAL surface area of the panel. In some instances, people may want multiple EL Panels on a single inverter, A suitable inverter can be apply powers to one larger panel, or multiple small panels.

a transparency materials
and placing that on top.

This technology gives you
endless possibilities and
can be incorporated in
any design or project.

Product Description
FLEX LIGHT

General Property

✔ **Flexibility** - Can be applied to a flat or curved surface

✔ **Low operating temperature** - Flex light is a cold lighting source and does not generate any heat due to its electronic luminous emission

✔ **Lightweight and Thin shape**

✔ **Efficiency** - 80% of energy is converted to light

✔ **Low power consumption** - Consumes less electricity

✔ **No Glare** - Flex light produces a soft even light over the entire surface

✔ **Visibility** - can be seen from far distances in darkness, smoke and frog

✔ **Works in all sorts** of environment and temperature

✔ **Maintenance free** and only need power to make it working instantly

Typical Properties

PROPERTY	DETAIL
Initial Brightness	200 lux
Average Service Life	8000 hrs
Color	• White (available tough printing overlay) • Blue-Green
Thickness	200 - 300 Micron
Dimension	Adapted to the design
Lighting	Animating or flashing

Flex light

Electroluminescent (EL) or Flex light is a flexible sheet coated with EL material which is an optical phenomenon and electrical phenomenon in which a material emits light in response to the passage of an electric current or to a strong electric field.

As applied an AC/ DC signal of sufficient voltage and frequency through the driving electronic, an electric field is formed across the sheet allows the phosphor crystals rapidly charged and emitted light energy which illuminated the printed overlay. This causes to have the visible light.

Color

○ **White** (available tough printing overlay)

● **Blue Green**

Technical Data
INVERTER

ALL Flex light or Electroluminescent material needs an inverter to make it work. Inverter does is convert a voltage into a high frequency. In doing so, it excites the phosphor particles inside the EL Material and glows a brilliant glow.

Inverters are a specific design for EL material, so be sure to select an inverter that is capable of handling the Electroluminescence.

Product Detail

Model	Power Consumption (Power, Current)	Operating Voltage for EL	Frequence Blue, White (Hz)	Inverter Size (mm)
Flex Light A4 (Inverter 12 VDC)	22W, 1.8A	150 VAC	800, 1100	116 x 56 x 35
Flex Light A4 (Inverter 220VAC)	22W, 1.8A	150 VAC	800, 1100	116 x 56 x 35
Flex Light A5 (Inverter 12 VDC)	13.2W, 1.1A	120 VAC	600, 900	116 x 56 x 35

Food packaging
made from bioplastics,
clean, safe and 100% compostable

bio·eco

100% Compostable

Bio packaging - 100% naturally compostable, good for you, good for the Earth.

Raw materials made from cornstarch, sugarcane, and cassava

Clean & Safe for your health

By **THAIKK** GROUP

Safe and
100% Compostable

WHY
BIO-ECO?

Bio-Eco - the leading manufacturer and distributor for bioplastic, plastic-free & other eco-friendly packaging. Our single-use food packaging products are made from renewable resources like corn, cassava, & sugarcane. Our innovative technological advancements have helped us ensure we deliver high-quality and food-safety packaging
(certified by ISO, GMP, FDA, SGS).

Our bioplastic packaging's key strength is that it can be 100% compostable within 180 days through home and industrial composting methods. Once composted, the bacteria, microorganisms, humidity, and temperature will break down our single-use paper packaging into water, CO2, and organic soil. The soil will then be able to use for growing new crops.
