# Stimulation/ Vibration

**Electrical Stimulation** is sometimes given to **patients with facial palsy**. The facial nerve normally emits electrical impulses to **give muscles** their **tone and shape**.

When the facial nerve is damaged the muscle no longer receives these messages and as a result the muscles become weak and floppy.

**External electrical stimulation** can try and **mimic these electrical impulses** and help **restore muscle tone**.

# ReActive

COLLECTION

**Strengthen** your **weak muscles** with this therapy that **decreases pain, inflammation and improves blood circulation** to help your muscles to contract and relax properly.

# EMS™

Electrical **M**uscle **S**timulation or **EMS** is the **elicitation of muscle contraction** using electric impulses.

This machine **stimulates muscle motor nerves** rather than sensory nerve endings. Electric Muscle Stimulators are used to help **prevent muscle atrophy** to assist in **relieving pain** and **toning muscles**.

EMS™

## Muscle Stimulation Cream

It combines a massaging motion with a unique **heating effect** which will **promote the production of collagen** and maximizes all product absorption.
