Care and Maintenance

Recommended Procedures

Dust down with a soft, clean brush only. Do not use excessive force when removing staples as this may damage the material. Water or cleaning agents should not be used.

To reduce the risk of fire, please make sure that notices on the board do not protrude out of the board and are in single layers. Notice boards should not be fitted near, or directly above any gas heaters or other sources of combustion.

Please note:

- If in any doubt about the nature of the cleaning agent you intend to use, always try on a small test area of the surface first.
- Under no circumstances should scouring pads or abrasive bathroom/kitchen surface type cleaning agents be used on whiteboard surfaces. The more abrasive the cloth or cleaner, the more it will wear away the surface.
- Under no circumstances use lighter fluid or any other substance that could dissolve the laminates surface.
- Only clean whiteboard surfaces occasionally as and when necessary. Excessive or regular cleaning with water, spray window cleaner or any proprietary whiteboard-cleaning agent may prove detrimental to the surface in the long term.

We offer our noticeboards in a range of different fabrics and finishes: Pitts Polyclour FR, Camira Lucia, Charles Twite, Corded Hessian, Cork, Premier Felt, Galaxy Screen, Sundeala and Forbo Nairn
