PMMF2412/PMFR2412	2400x1200mm	8.5kg

Hardwood/Unframed: add H/U at end of code

## **Care and Maintenance**

### **Recommended Procedures**

Dust down with a soft, clean brush only. Do not use excessive force when removing staples as this may damage the material. Water or cleaning agents should not be used.

To reduce the risk of fire, please make sure that notices on the board do not protrude out of the board and are in single layers. Noticeboards should not be fitted near, or directly above any gas heaters or other sources of combustion.

**We offer our noticeboards in a range of different fabrics and finishes: Pitts Polycolour FR, Camira Cara, Camira Lucia, Charles Twite, Cork, Premier Felt, Galaxy Screen, Sundeala and Forbo Nairn.**

*Disclaimer: The above cleaning/maintenance recommendations have been derived from years of practical experience and should be regarded as helpful guidelines only.*
