PPEO129(-5) 1200x900mm Net Weight: 4.3kg

PPEO1510(-5) 1500x1000mm Net Weight: 5.8kg

Cleaning Instructions

Use a cleaning solution made especially for plastic, and soft cotton microfiber cloths. It is important to use a product made for acrylic, because many household cleaners, can break down the material and make it look cloudy.

- Make sure your microfibre cloth is clean
- Sweep the cloth over both sides of your acrylic to remove any loose dust or dirt.
- Spray a small amount of Acrylic Cleaner onto a different soft cotton cloth – wipe this onto your acrylic.
- Wipe gently until the cleaner is totally gone.
- Let your acrylic dry and handle by its edges again to put it back into use.

Never use chemicals to clean acrylic – they will damage it. You should also **avoid:**

Any ammonia based cleaner e.g. window cleaner

Abrasive or caustic cleaners

WD-40 or any other petroleum-based chemical

Scrubbing pads or other abrasive pad.
