

THE CAMBRIDGE-YEREVAN SISTER CITY ASSOCIATION

Presents a Panel Discussion in conjunction with the Cambridge Science Festival

Artificial Intelligence: Getting Smarter Every Day

Come and learn all about the exciting world of artificial intelligence. Experts from the Boston area and Armenia will share examples of how and when AI is being used, as well as what the future holds for this amazing industry!

Tuesday, April 16, 2019 7:00PM
Tufts University Alumnae Lounge
40 Talbot Avenue, Medford

Special guest panelist from Armenia **Vazgen Hakobjanyan**, co-founder of Teamable Software and partner at Smartgate VC

John W. Fisher III, Senior Research Scientist in the Computer Science and Artificial Intelligence Laboratory at MIT

Gevorg Grigoryan, Chief Technology Officer at VL56, Inc., a new privately-held, early-stage biotechnology company that is pioneering computational protein design

André Rocha, Venture Capitalist at Glasswing Ventures

Moderated by **Aram Adourian** of Flagship Pioneering

Experts in Armenia believe that artificial intelligence can help develop the economy through schools and companies. In Cambridge, artificial intelligence has already become an integral process across the city and further efforts are being explored to increase its impact.

Co-sponsored by the Tufts Armenian Club and the National Association for Armenian Studies and Research (NAASR)

Free and open to the public, ample parking.
Refreshments to follow.
