

PRODUCT DETAILS

compostBOOST is your go-to compost accelerant and odour eater. The good bacteria in compostBOOST breaks down organic matter quickly and promotes optimum conditions for turning 'waste' into quality compost faster.

*We recommend using the SPICE (Static Pile Inoculated Compost Extension) composting method.

Food2Soil compostBOOST can also be used as an odour neutralizer in bins, animal 'waste' areas and other problem areas where good bacteria are needed, just put diluted mix in a spray bottle and go for it.

Application rates:

Compost accelerant

Mix ¼ cup compostBoost per 1L of water, to cover 1m³ of material to be composted

Odour neutralizer

20:1 solution for agricultural purposes (e.g., animal bedding) & 100:1 for domestic purposes

Storage

Store in a cool, dry, place away from direct sunlight for up to 1 year or 2 years refrigerated. If storing at room temperature growth may develop on the top of the liquid, this is fine and in no way means the product is spoiled. *Please Note* The bottle cap is fitted with a venting system, to allow gases from microbial activity to escape.

Undiluted inoculum has a low pH (3.5-4), avoid inhalation and contact with skin or eyes. If undiluted solution gets in eyes, rinse immediately. Wearing a mask and gloves is recommended.

Safe for pets and wildlife.

Not for human consumption.
