

Introducing the TOUGH BOATS™ line: the epitome of speed, efficiency and durability in workboats. Engineered primarily for commercial applications like construction, maintenance, surveying, materials handling, and transport operations, our vessels redefine toughness.

Crafted with an innovative polyethylene twin or triple pontoon design, our boats adhere to our self-imposed standard of quality: INDESTRUCTIBLE. These are not just vessels; they are indispensable assets designed to endure the rigors of daily construction work and support the crews who rely on them.

In your arsenal of equipment, your TOUGH BOAT™ will stand out as the most valuable tool, bar none. With TOUGH BOATS™, durability isn't just a feature; it's a promise.

# INTRODUCTION

But versatility is also key. Our vessels can be utilized individually for navigation or configured in paired formations, locked together in a modular system. This allows for an expanded deck space while preserving the agility and flexibility of smaller vessels, essential for maneuverability and docking. Additionally, they excel in cargo and material transport, serving as platforms for various water-based activities on their open decks.

## WORKBOAT RANGE-

Model	loa	boa	Layout	capacity
<b>TOUGH18</b>	18.4'	8.6'	tiller/console	4500/6750 lbs.
