

# GLOVE SIZING CHART

Not all disposable gloves are created equal, nor do they all share the same materials, shape, thickness, elasticity, texture, overall dimensions or other sizing specifications.

If you're a first time PermaSafe Industrial Nitrile Glove buyer, or unsure of what size glove will provide you the best fit and feel, measure the palm of your hand as indicated below and, utilizing the following chart, select the Glove Size that best corresponds to your palm measurement.

Glove Size	Inches	Centimeter
<b>Medium (M)</b>	3.2 - 3.5	28.12 - 8.9
<b>Large (L)</b>	3.5 - 4	8.9 - 10.16
<b>Extra Large (XL)</b>	3.9 - 4.5	9.9 - 11.43

\*Please note: Gloves thicker than 6 mil thick tend to fit more snug than other nitrile gloves.
