

Everything you need is included and cut to size so you won't need to spend time looking for the right components and cutting to length. Simply unpack and install.

REQUIRED TOOLS: Drill, screwdriver, safety goggles.

KITS INCLUDE

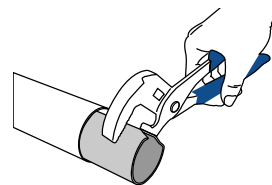

- High Quality Metal Railing: True solid metal (not plated) ensures years of beauty and durability.
- Combination Brackets: These classic brackets attach to the face of the bar or counter and extend to the floor for added support and stability.
- Flush End Caps: For a clean look that complements any traditional or contemporary décor.
- Internal Splices: For joining rail segments. Splice seams are hidden under the bracket collars for a sleek continuous look.
- All screws and hardware.
- A complete installation leaflet

STEP-BY-STEP INSTRUCTIONS

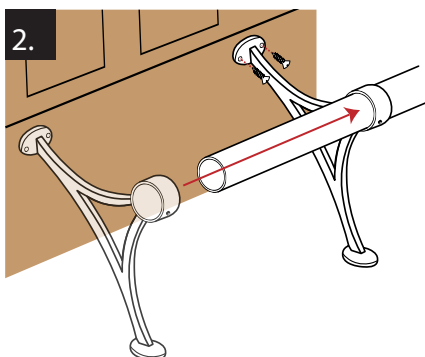

Use the splicer to join the two lengths of rail together.

NOTE: For kits with single tube, begin with step 2.

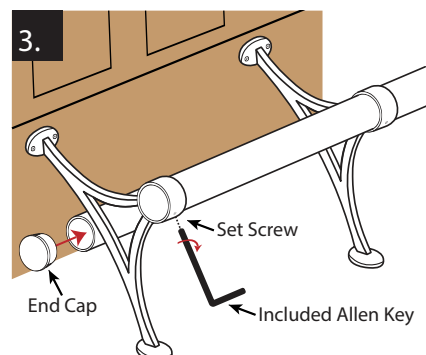

TIP: Use a wrench to crimp the splicer in order for it to fit inside the rail.

Slide the combination brackets onto the rail and secure them to the bar with the provided screws.

Pro tip: Make sure the openings of your brackets are clean and smooth to avoid scratches when sliding them into place.

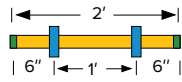

We recommend coating the inside of the end of your tubing with an adhesive, before inserting the end caps for a permanent bond OR wrap the stem of the end cap with masking tape or electrical tape several times before sliding it into the tubing for a snug fit.

Secure the combination brackets in place with a set screw. Insert the end caps on each end of the rail.

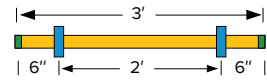

NOTE: Be sure to cover the seam of the joined rail with a combination bracket.

2-ft Foot Rail Kit

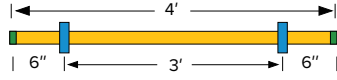

- 2' Tubing (1)
- Brackets (2)
- End Caps (2)

3-ft Foot Rail Kit

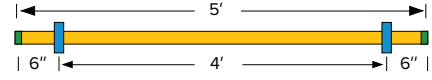

- 3' Tubing (1)
- Brackets (2)
- End Caps (2)

4-ft Foot Rail Kit

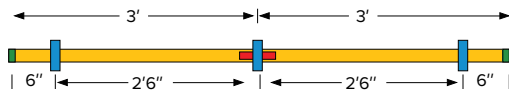

- 4' Tubing (1)
- Brackets (2)
- End Caps (2)

5-ft Foot Rail Kit

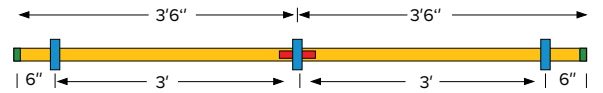

- 5' Tubing (1)
- Brackets (2)
- End Caps (2)

6-ft Foot Rail Kit

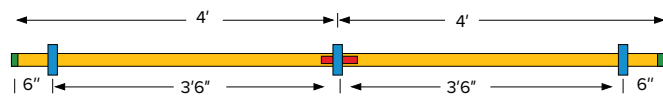

- 3' Tubing (2)
- Brackets (3)
- Splice (1)
- End Caps (2)

7-ft Foot Rail Kit

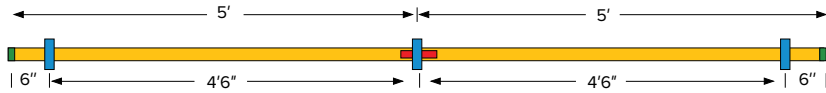

- 3'6" Tubing (2)
- Brackets (3)
- Splice (1)
- End Caps (2)

8-ft Foot Rail Kit

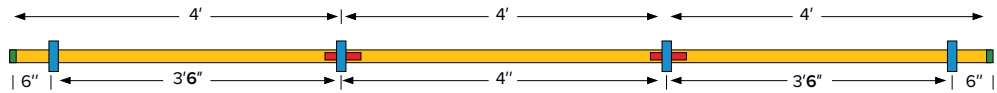

- 4' Tubing (2)
- Brackets (3)
- Splice (1)
- End Caps (2)

10-ft Foot Rail Kit

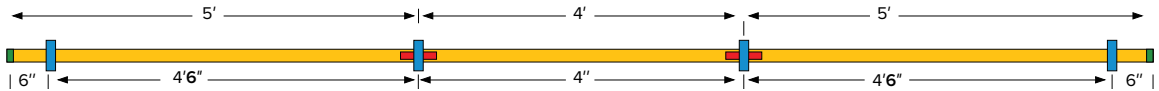

- 5' Tubing (2)
- Brackets (3)
- Splice (1)
- End Caps (2)

12-ft Foot Rail Kit

- 4' Tubing (3)
- Brackets (4)
- Splice (2)
- End Caps (2)

14-ft Foot Rail Kit

- 5' Tubing (2), 4' Tubing (1)
- Brackets (4)
- Splice (2)
- End Caps (2)

For shipping, ease of assembly, and safety, larger tubes are split into smaller lengths
