

Changing Your Pump for Presta Valves

Your pump has been set up for Schrader (Mountain Bike/American) valves. To use this pump for Presta (Road Bike/French) valves, please follow the instructions below:

1. Remove the dust cap and unscrew the head of the pump as shown above.

2. Remove the three parts shown in the photo from the head of the pump.

3. To set up for Presta. Flip individual parts 180 degrees **2** & **3** as shown in the photo above, then place back into the pump head. Once fitted, you are ready to inflate your presta valve.

Using Your Mini Pump

Your pump is supplied from the factory ready to inflate Schrader (Mountain Bike/American) valves. To use this pump, simply follow the instructions below:

- 1** Remove the dust cap and attach to the inner tube valve
- 2** Lock the pump on to the inner tube valve using the thumb lever.
- 3** Inflate to the required PSI / BAR
- 4** Unlock the thumb lever & remove the pump from the valve once inflated.

Additional Adapters Included With Every Pump

Sports ball needle and inflatables adapters also included. All 3 adapters slot into the pump head to easily inflate. Please make sure the locking lever is used when inflating to create an air seal.
