GoFusing.com Awareness Ribbons #33650

Form and are meant to be Kiln Fired as a permanent bond to glass or ceramics.

Note: It is always best to pre-fire your glass or ceramics to its finished state and then perform a second firing to fire the decal at a lower temperature tack fuse in order to help retain the richness of the color, especially reds which are the most heat sensitive.

Use the documents [Awareness Ribbon by Color Meaning by Month](#) or the [Awareness Ribbon Color Meaning](#) by the associated Cause to help you determine what color decal to order.
