

MORE POWER

WITH A NAVARA INTERCOOLER SYSTEM

If it's diesel injection or turbo **DENCO DO IT.**

denco
DIESEL + TURBO.

The NAVARA INTERCOOLER SYSTEM gives you up to 20% MORE POWER.

Not only does the Navara Intercooler System increase the power of your Navara by up 20% but it also uses a 50/50 glycol/water mixture and its own cooling system to reduce the turbo heated air flowing from the turbo. Once the vehicle reaches 30km/h the fan switches off increasing the air cooling effect.

Other features:

- Keep your aftermarket accessories
- More efficient than air to air systems
- Better looking
- More responsive at low speed
- Independent Radiator System for cooling liquid
- Great Price
