

+ WATERSCAN

Protect your vehicle from water!

Water is the most common contaminant of common rail fuel systems. It causes premature wear to the fuel injection system and pump. Even a small amount of water in your fuel system can have destructive and expensive consequences but a waterscan kit can save your hip pocket and potentially your vehicle!

Protect your vehicle now, with a Denco Diesel + Turbo Waterscan Kit.

+ Kits include:

✓ Dual flow head	✓ Dash light and harness
✓ Water detection probe	✓ 10mm or 12mm fuel fittings
✓ Water sedimentor	✓ Fitting instructions

10mm fittings are recommended for the following popular vehicles:

- Toyota Hilux 1KD-FTV CR
- Toyota Prado 1KD-FTV 120 and 150 series
- Ford Ranger / Mazda BT50 3.2ltr
- Holden Rodeo / Colorado / Isuzu D-MAX 3ltr
- Nissan Navara D40 / D22 & Pathfinder
- Nissan Y61 Patrol

12mm fittings are recommended for the following popular vehicles:

- Toyota Landcruiser V8 200 Series
- Toyota Landcruiser V8 79 Series
- Mitsubishi Triton / Pajero 4D56 CR

8mm fittings are recommended for the following vehicles:

- Ford Ranger
- Mazda BT50 3ltr

Complete Waterscan Assemblies including Universal Waterscan, Mounting Bracket and fitting kits are also available to suit popular makes and models.
