

A hand is shown holding a large, irregularly shaped rock specimen. The rock has a highly polished, golden-brown surface that reflects light. The interior of the rock is visible, showing complex, swirling patterns of lighter and darker colors, including some orange and green. The background is a plain, light gray surface.

Selections

J Schatz Earth is driven by love, a sense of wonder, and the desire to create objects and decor that are earthbound and primitive with evidence of the hand. Everything is designed by Jim and Peter, and brought to life with unique forms, textures, and finishes that are complex, rich, and bold. GOLD AMORPHOUS SCULPTURE

\$1,900

We hand sculpted this amorphous sculpture from white stoneware clay, fired it twice and then overglaze fired it to a lustrous gold finish.

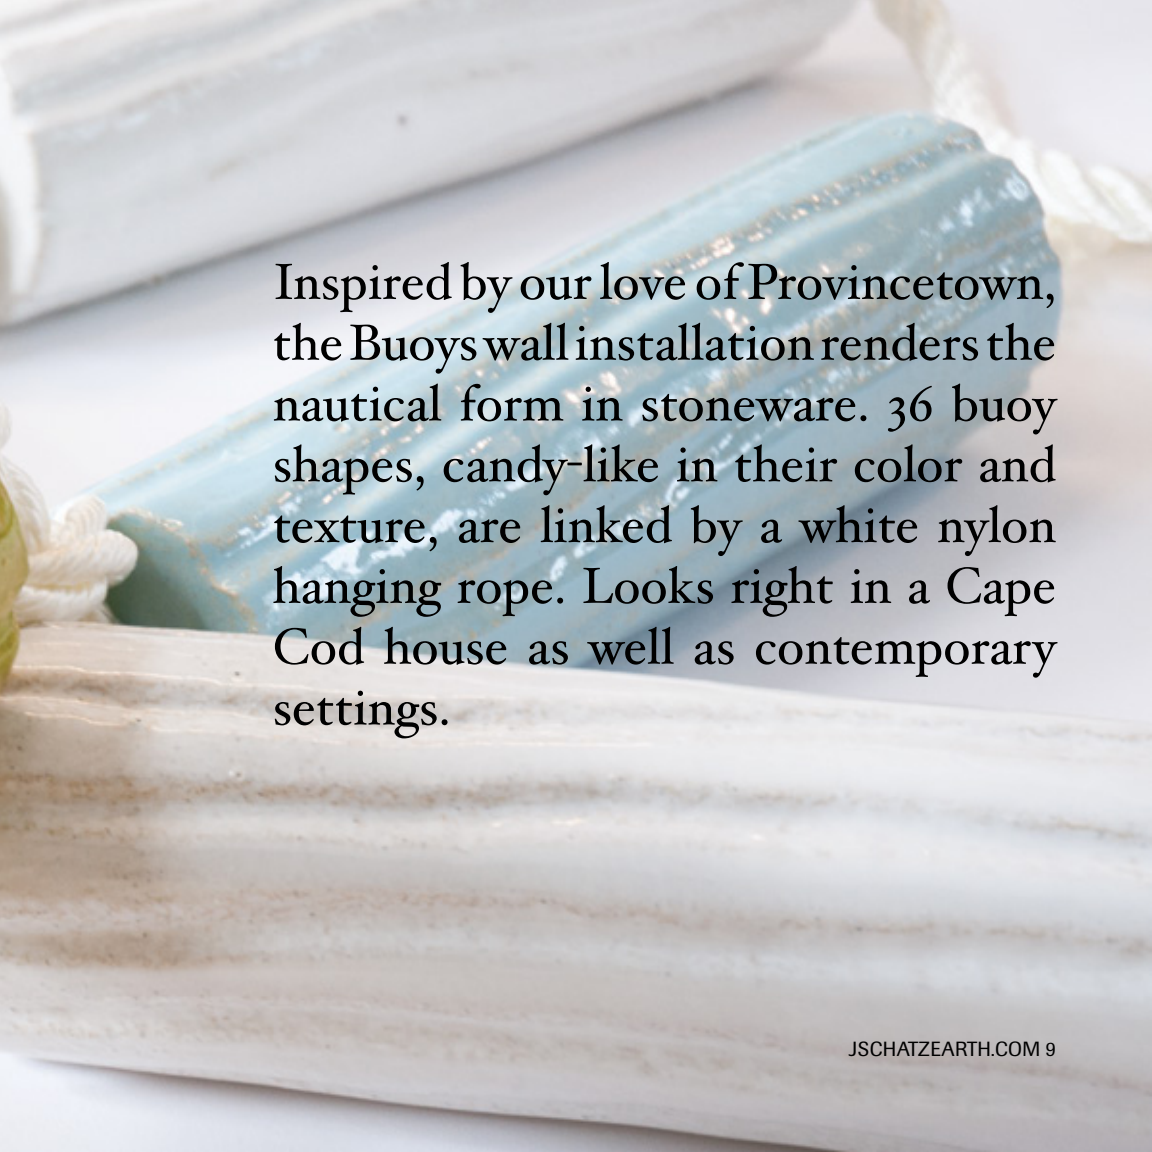

LINKS

\$5,000

Links is a slab-built wall sculpture of 38 intertwined stoneware links that descend to the floor. Red-brown clay is glazed on both sides. Thoroughly modern, strong, shiny, and earthbound.

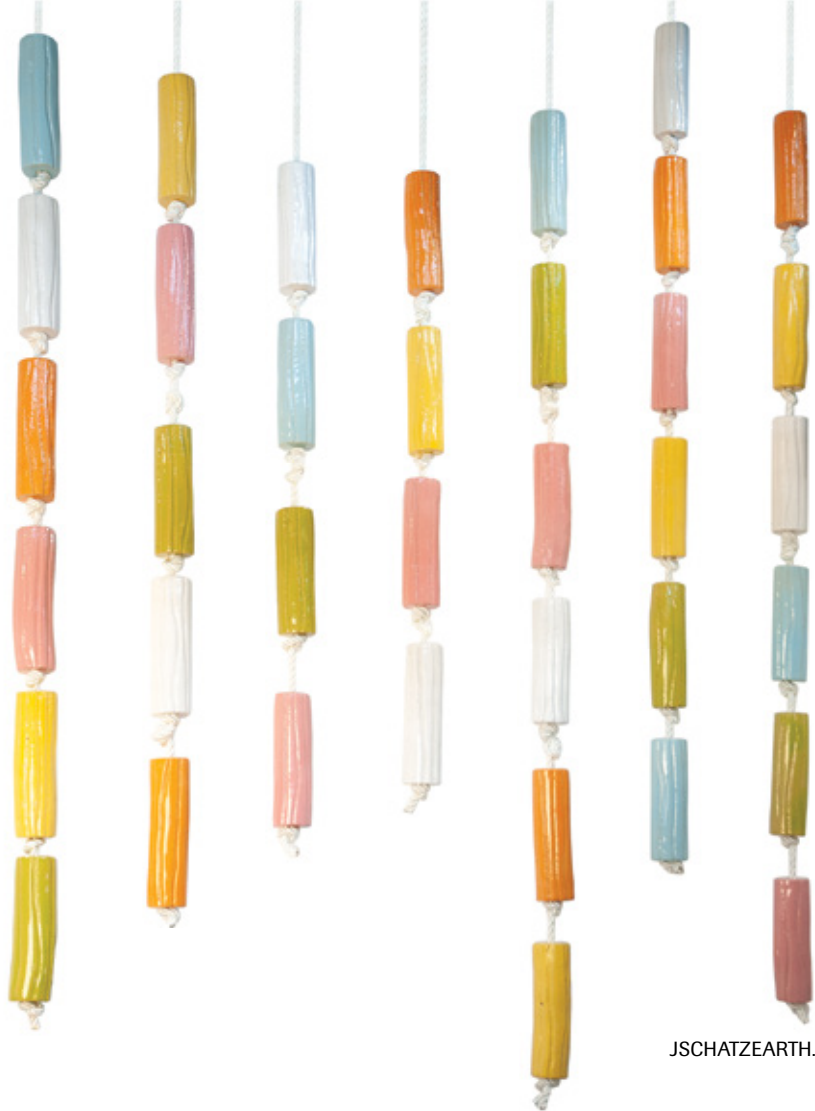

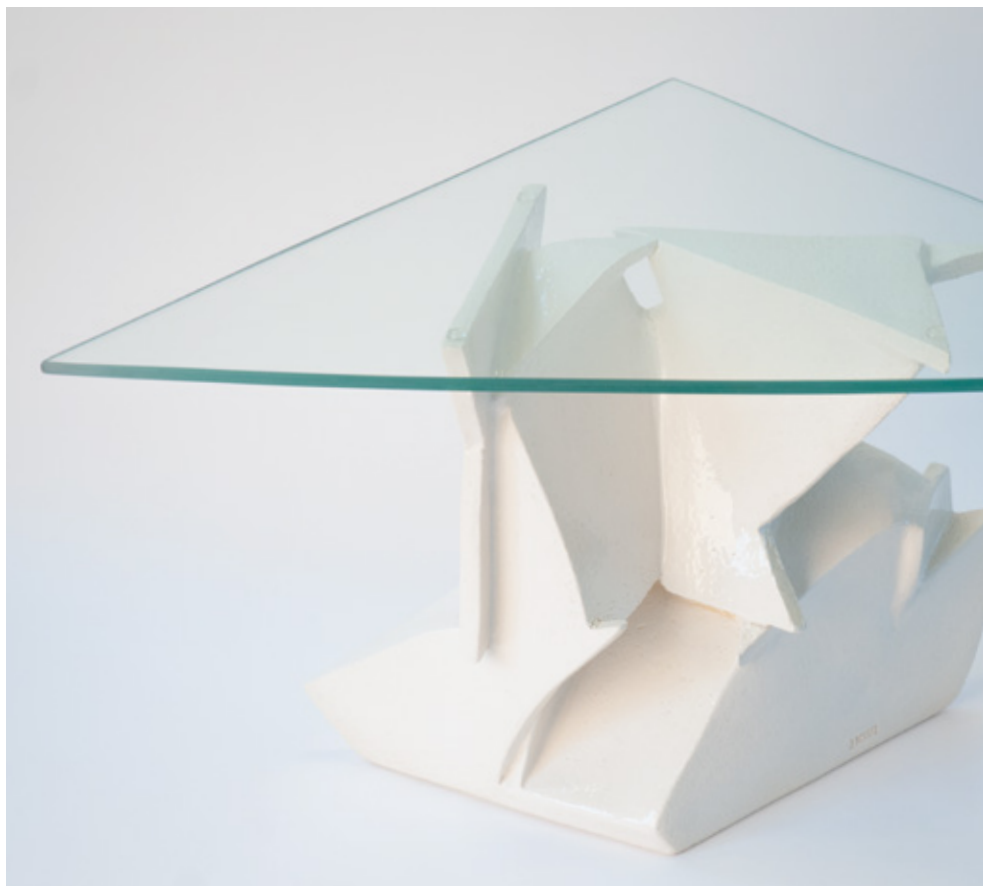

Inspired by our love of Provincetown, the Buoys wall installation renders the nautical form in stoneware. 36 buoy shapes, candy-like in their color and texture, are linked by a white nylon hanging rope. Looks right in a Cape Cod house as well as contemporary settings.

A close-up photograph showing a hand holding a white, cylindrical object, possibly a buoy or a piece of equipment. A thick, white rope is knotted around the object, with the knot visible in the foreground. The background is a plain, light-colored surface.

ANGLES TABLE

\$3,000

Lines, angles, cutouts, and shadows converge to make a dynamic piece of art. Triangular tempered glass rests on a hand-built base that's folded and molded from glossy stoneware. A beautifully functional one of a kind work.

Non-linear but connected, our Association Sculptures explore the properties of form, space, and perspective. Sculpted in one sitting from stoneware. The end result is really the beginning.

DESK LAMP A17-1
\$500

28 J SCHATZ EARTH

Our desire to create a “found” object led us to create the A17-1 Desk Lamp. This challenging form required years of fine-tuning the casting process until finally, it emerged as if from an architectural ruin. We finished the lamp in our metallic lava glaze and fitted it for the 21st century with an LED bulb.

Evidence of the hand is present in the JS 157 Stoneware Tableware Collection. Each piece has a speckled finish that comes through the glossy, earthy color palette. The underside of the stoneware pieces are earth-toned and unglazed. Plates are misshapen, have different weights, and unique patterns. Bowls are textured on the underside and are pleasing to hold. Designed to withstand everyday living.
