

FITTING INSTRUCTIONS

To ensure many years of trouble free horse comfort in your stables, please follow the instructions overleaf.

They are based on a 12' X 11' stable but can be applied to all stable sizes & shapes.

The aim of the game is to have a **1" gap around the perimeter** with largest sections laid from the door inwards- its as simple as that!

If in any doubt whatsoever, please feel free to call us on **01704 823215** & we will be happy to help!

Tools Required:

- 1. Stanley Knife / Jig Saw or Craft Knife*
- 2. Measuring Tape*
- 3. Straight Edge*

Thank you for choosing Mayo Horse Comfort stable matting!

- Starting from the door, lay as many full mats as you can.
- Push mats tight to the wall and doorway
- Take measurements A, B, C and D from end of the mats to the adjacent wall **Fig 1**
- Deduct 50mm (2 inches) from this size and cut mats to that length (A - 2", B - 2", C - 2", D - 2")

- Take measurements E, F, G and H from edge of the mats to the opposite wall. **Fig 2**
- Deduct 50mm(2 inches) from this size and cut mats to suit (E - 2", F - 2", G - 2", H - 2")

- Lever the mats away from the walls, so that a 25mm (1 inch) gap is left all the way around. **Fig 3**
- Size & position of sections for an 11' X 12' stable shown

It may be necessary to re-trim mats once more after they settle in.
