

## Reader Strength Estimator

To estimate your reader strength, print this page, then position **18-24 inches** away and read the text below:

**If this line is difficult to read use •••• +3.00**

**If this line is difficult to read, use •••• +2.50**

**If this line is difficult to read, use •••• +2.00**

**If this line is difficult to read, use •••• +1.75**

**If this line is difficult to read, use •••• +1.50**

**If this line is difficult to read, use •••• +1.25**

When printing this page, make sure to check that the scale is set to "Actual Size" or 100%. This guide is only an estimator, please see your eye care professional for more precise measurement of your reader strength.
