

DIY FUR STOOL

by Clever Poppy

Let me show you how to make a gorgeous fur stool for your home, without the luxury price tag! All you need is a stool with a flat top, a piece of sheepskin (or faux fur), some scissors and a can of Scotch Super 77 Spray Adhesive. You can also visit my website for more detailed instructions - www.cleverpoppy.nz. Have fun making!

with Scotch® Super 77
Spray Adhesive

Step One:

Turn your stool upside down and draw a circle around it on the sheepskin. Then cut a circle out that is about 5cm wider.

Step Two:

Hold can 6-8 inches from surface, then spray a couple of thin layers of glue inside the circle of the sheepskin. Let this dry.

Step Three:

Spray another two lights coats on inside the circle on the sheepskin and then also spray two thin coats on the top of the stool.

Step Four:

Wait approx 30 seconds and then place the stool upside down in the middle of the sheepskin and press firmly. Flip the stool over and leave to dry.
