Instructions

Stegosaurus

The Stegosaurus Completed Model

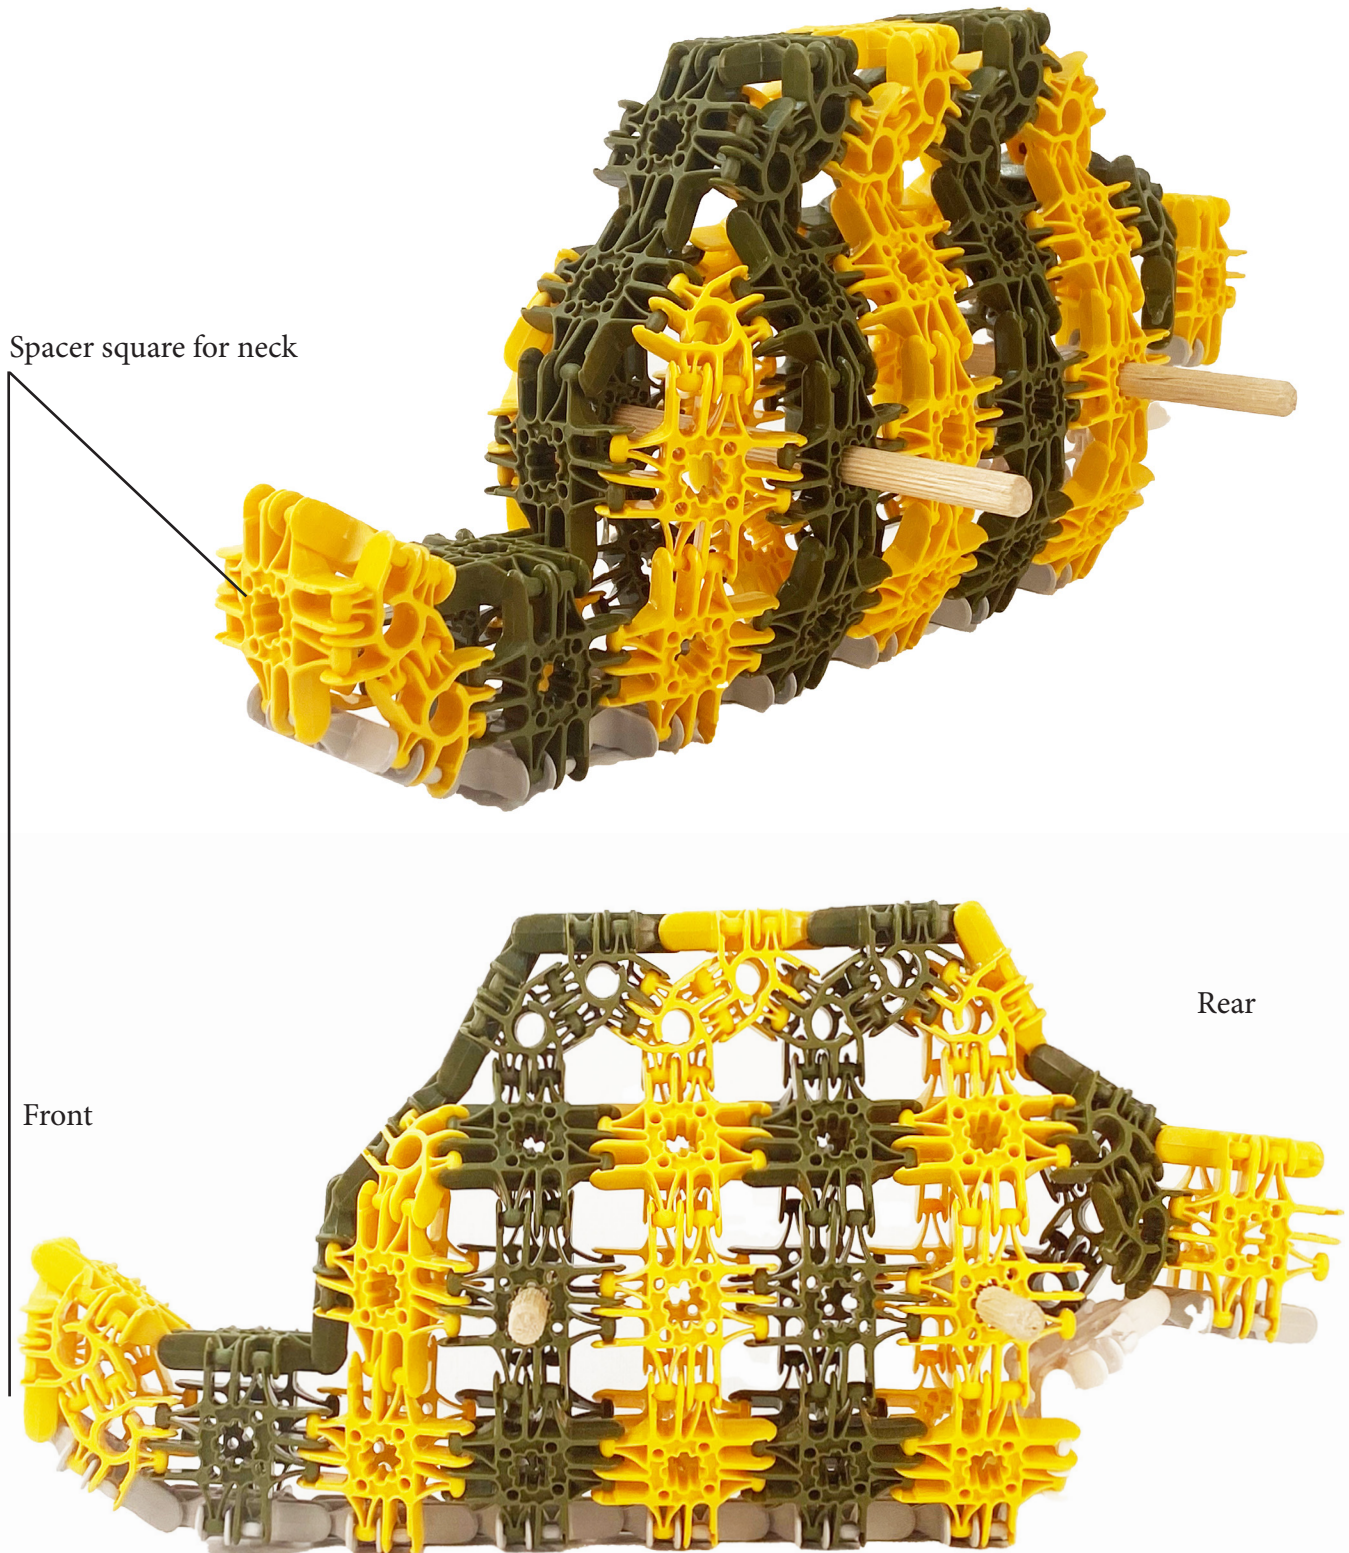

Tail section wags at two points

Tail section wags at two points

Make the Stegosaurus Torso.

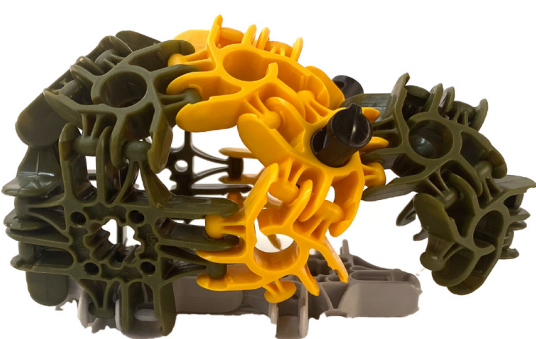

Bottom View

Slide long dowels evenly into torso. These will be used to attach the legs to the torso.

Making the Head

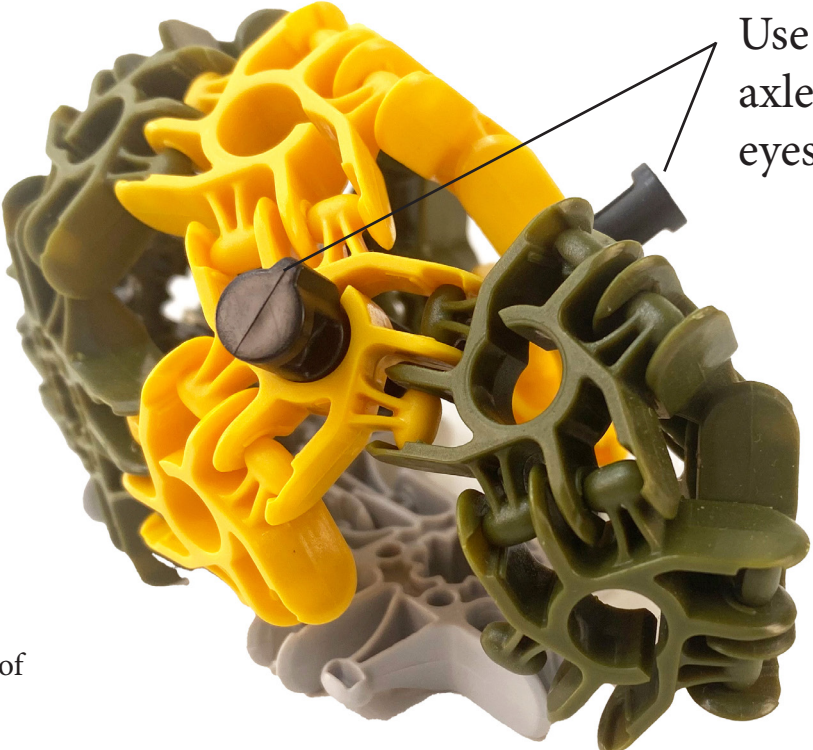

Side view of head

Bottom view of head

Top view of head

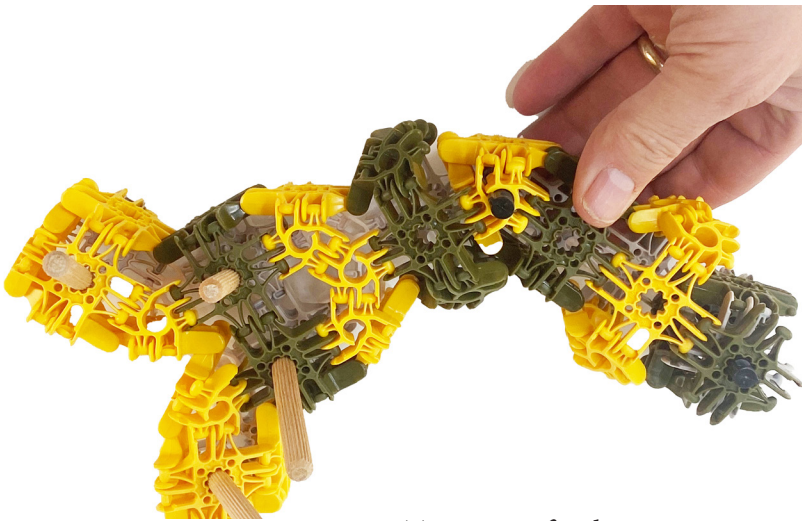

Three quarter side view of head

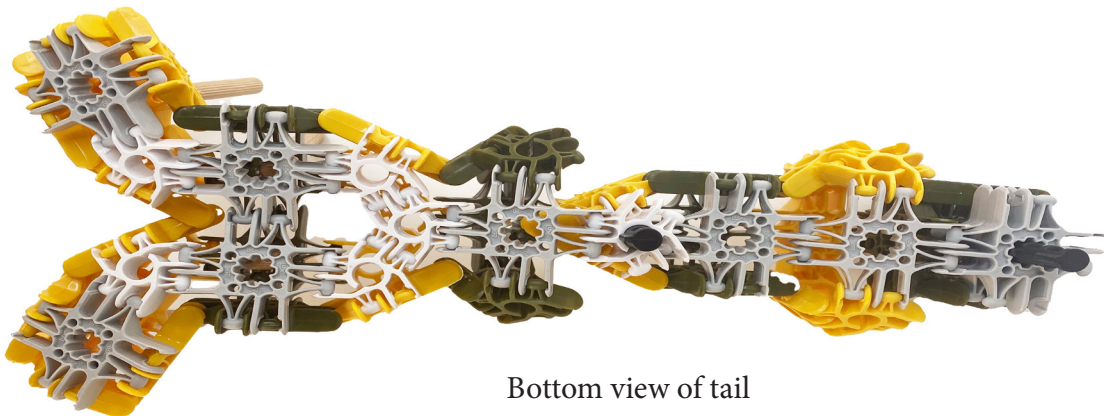

Slide head onto the neck dowel

Making the Tail

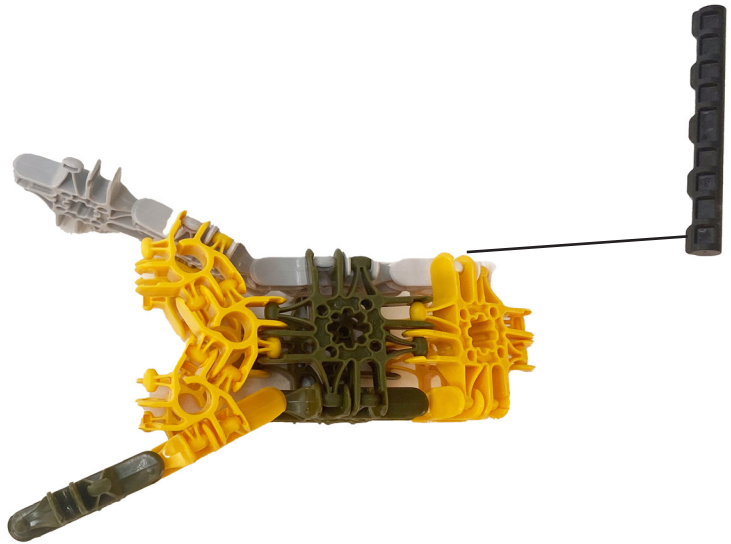

Top view of tail

Bottom view of tail

Front tail section

Rear tail section

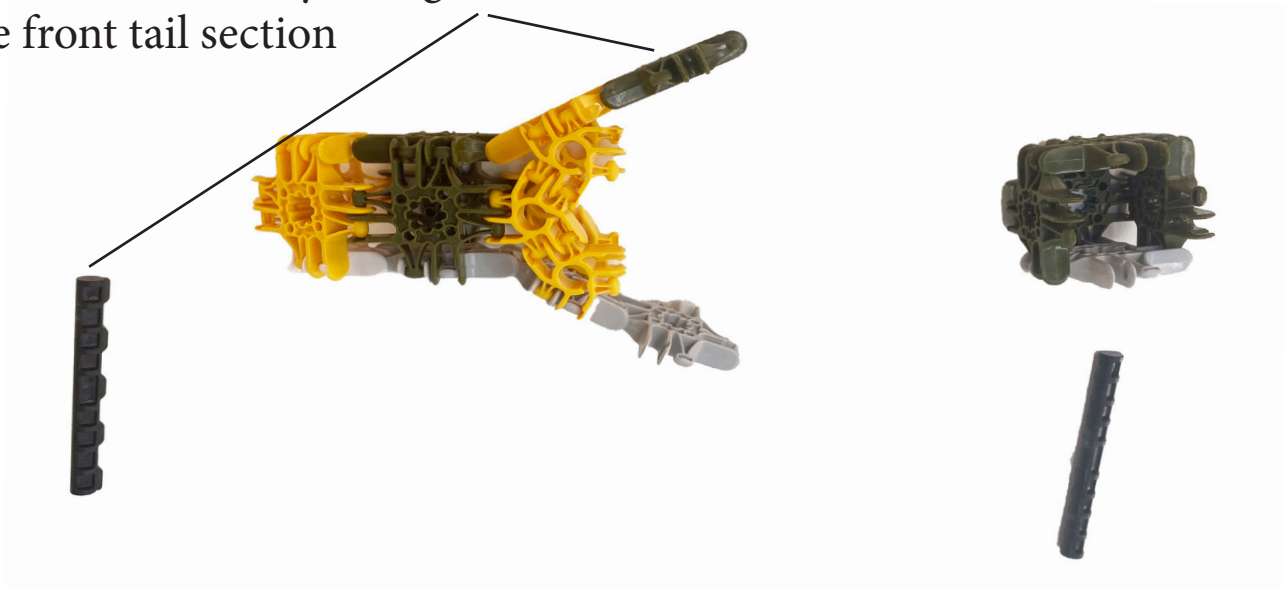

Mid tail section

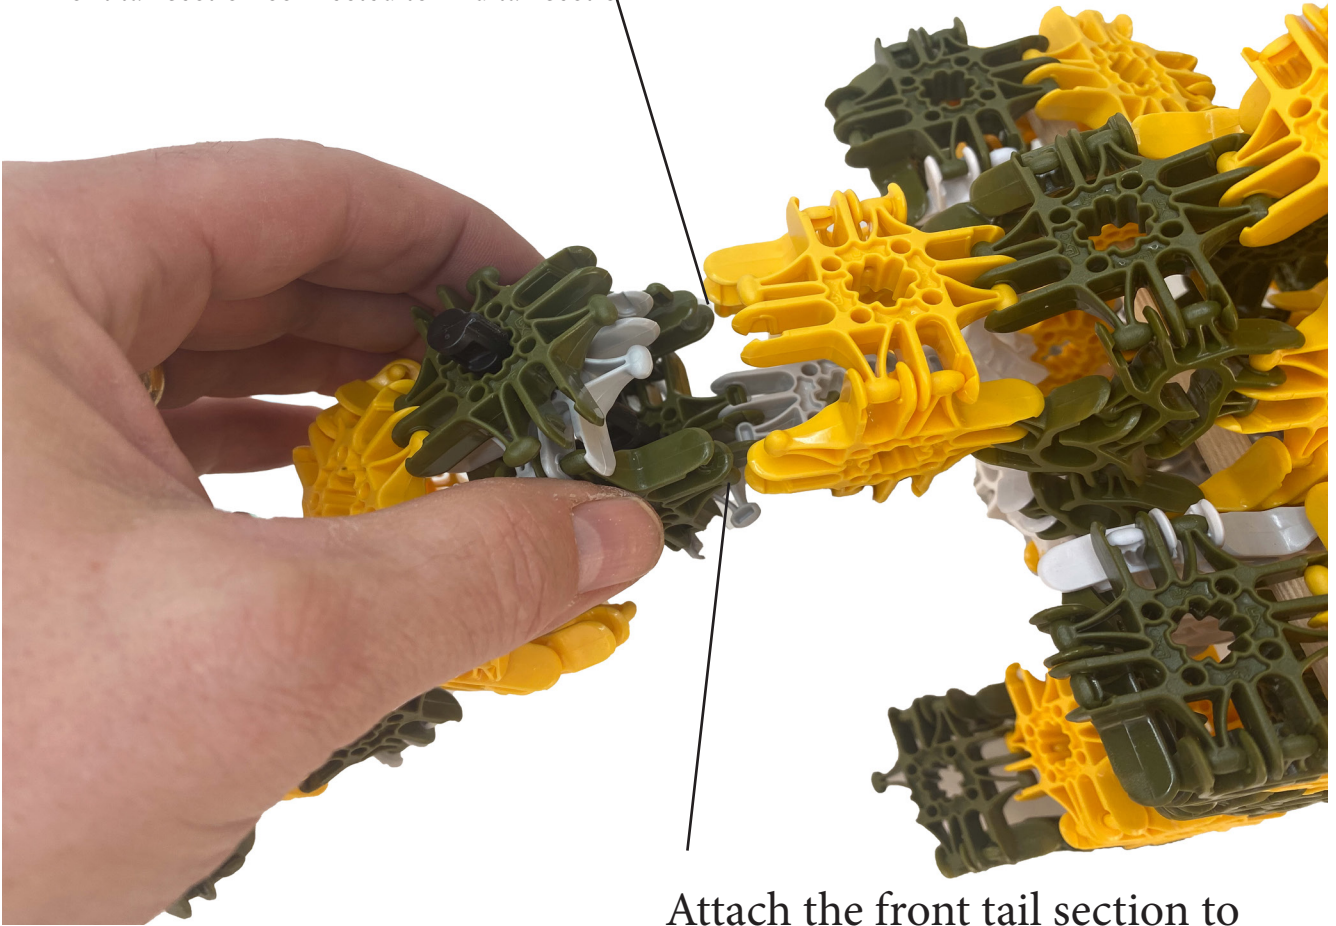

Make sure to line up the trigons so that the keys are aligned. This ensures that the axle can pass through.

Connect the front tail section to the mid tail section by sliding the axle into the top white square and bottom grey square

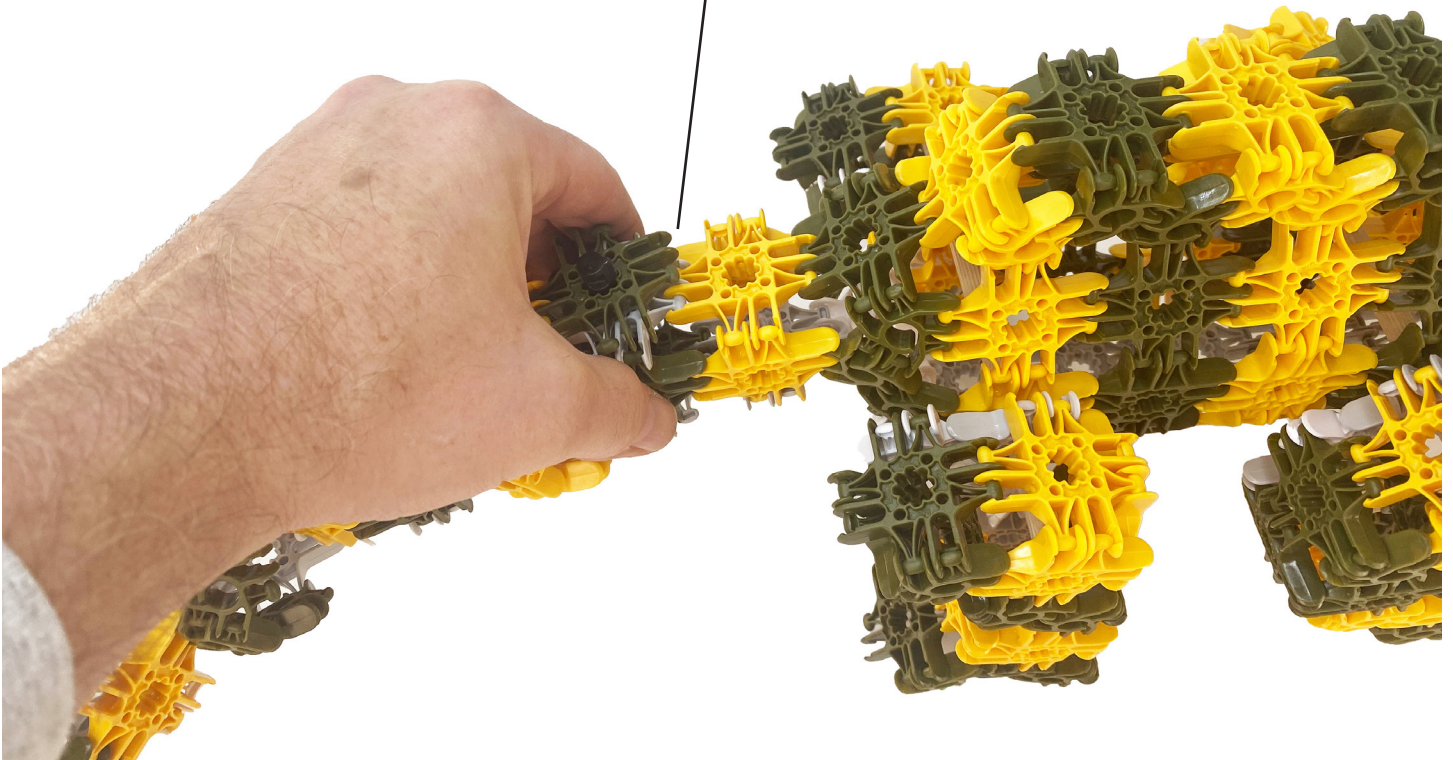

Slide #5 axle evenly through the front tail section

Front tail section connected to mid tail section

Attach the front tail section to rear section of torso

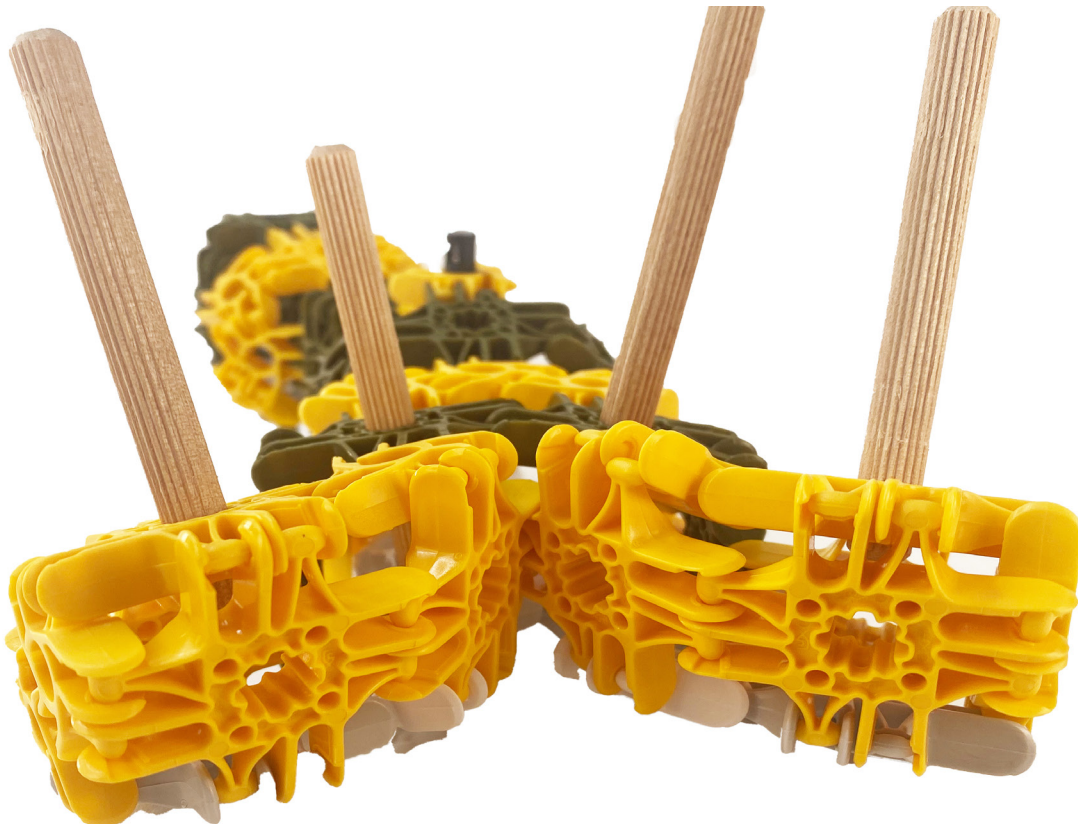

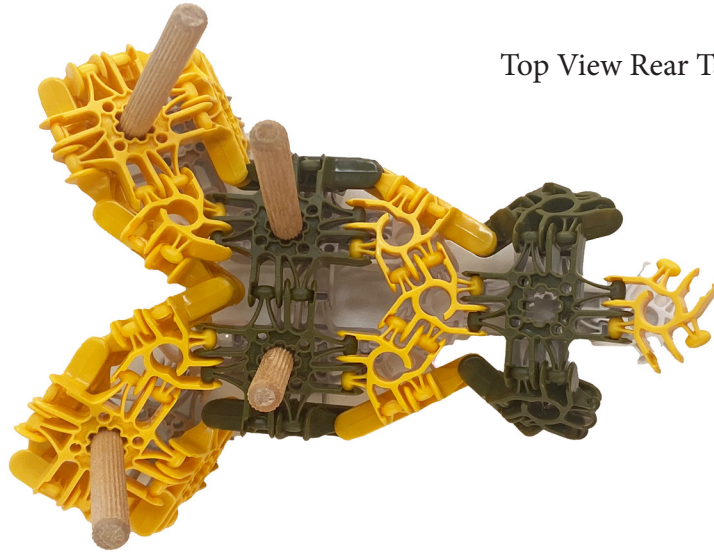

Bottom view rear tail section

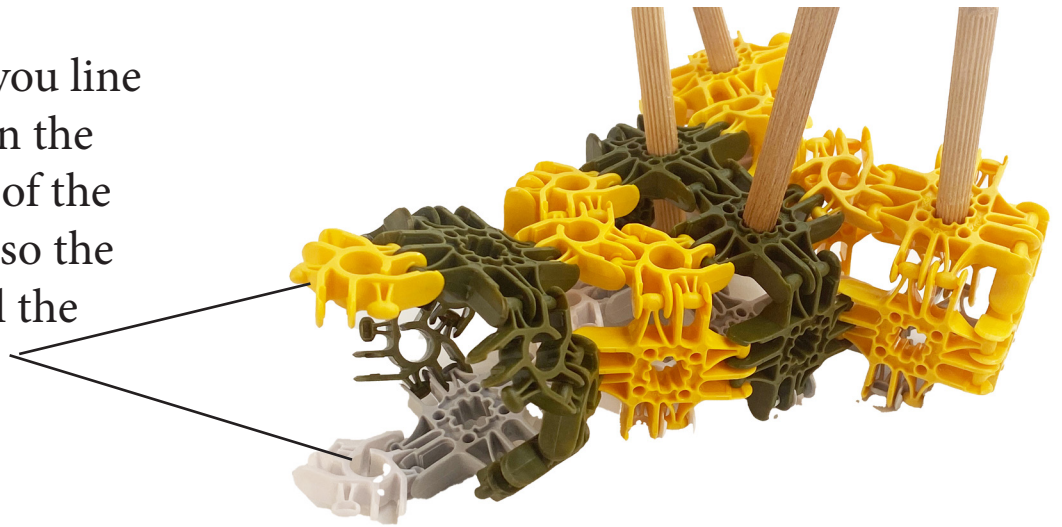

Make the rear tail section

Top View Rear Tail Section

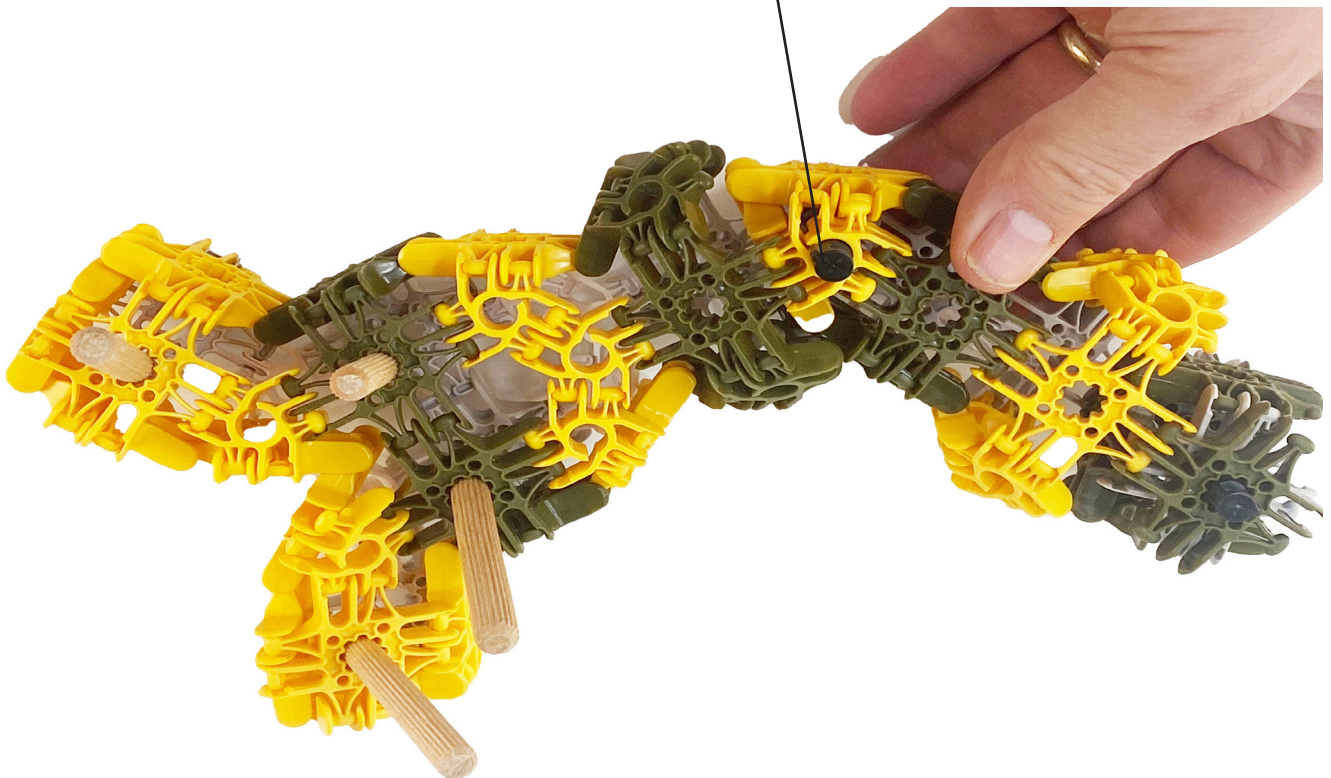

Rear view of the rear tail section

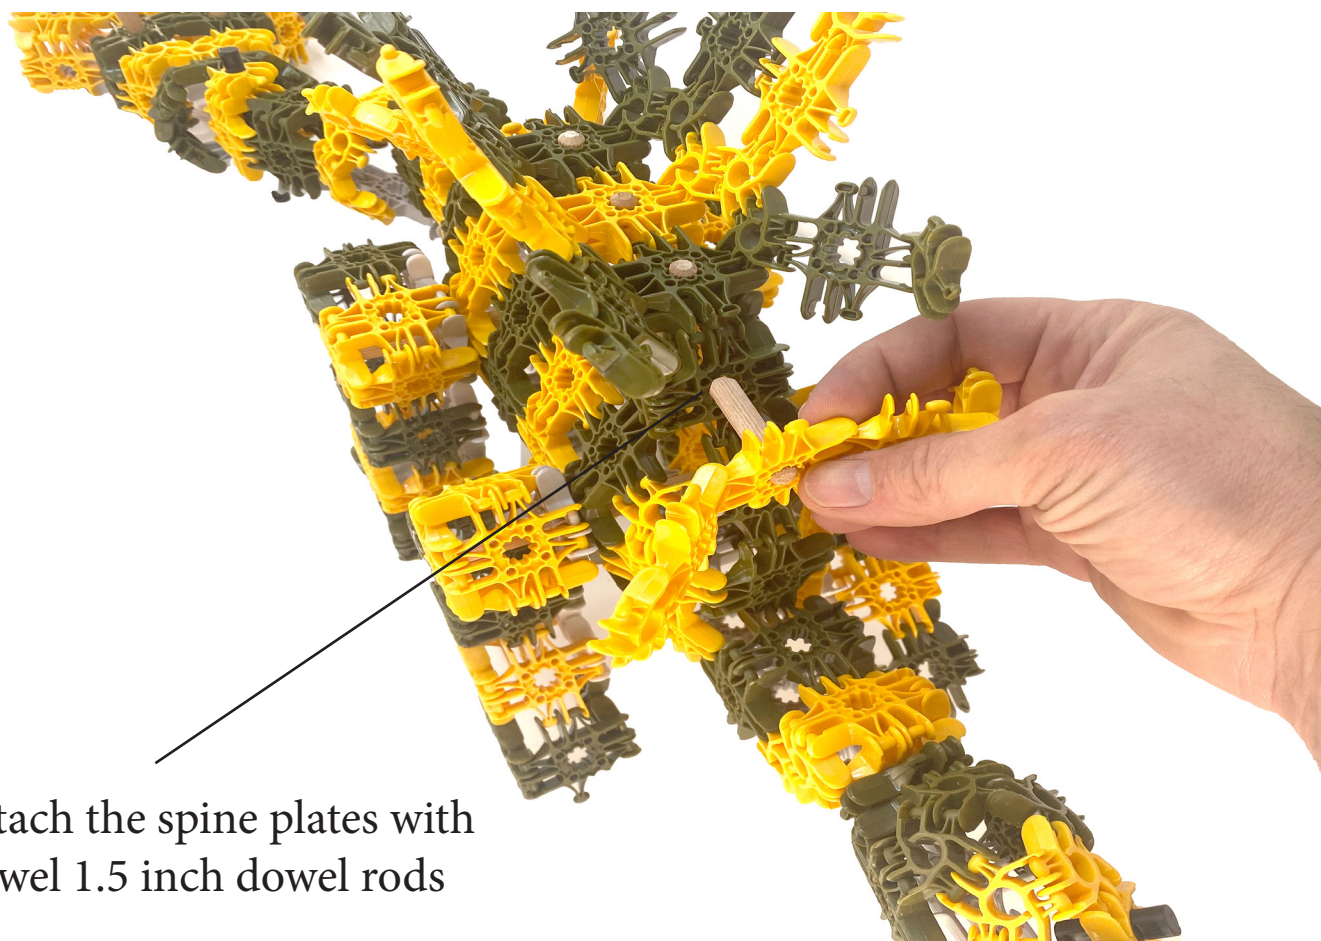

Make sure that you line up the trigons on the top and bottom of the rear tail section so the axle will slide all the way through

Slide the rear section trigons over the axle on the mid tail

Make the spine plates

Attach the spine plates with
dowel 1.5 inch dowel rods

Make the legs

Right Front Leg

Left Front Leg

Attach the Front Legs

Right Rear Leg

Left Rear Leg

Attach rear legs

Enjoy your Stegosaurus!
