The Large Shelf Bracket MUST be securely mounted into wood wall studs. It is very important this bracket be securely mounted.

**Installation Guide:**

**Step #1:**
Install Large Shelf Bracket directly into the wood wall stud using the appropriate wood screws. It is very important this bracket be securely mounted. We recommend hitting each stud for maximum protection.

**NOTE:** We have provided screws HOWEVER make sure the length of the provided screws are appropriate for your project. If not appropriate DO NOT use the screws provided. Each project is different so protect your project by measuring before you add the screws.

**Step #2:**
Once the brackets are securely mounted into wall studs, place your countertop, desk top, shelf or mantel directly on the Large Shelf Bracket & caulk with clear silicone.

**SAFETY INSTRUCTIONS**

- Use the correct tools.
- Wear safety goggles & proper safety equipment.
- Follow fixture, power tools & paint manufactures instructions & user manuals.
- Use common sense & follow good construction practices.
- Consult a professional when installing brackets for load bearing application.
- Be sure the bracket has a substructure that is able to support the bracket & any other additional weight that may be added to it.
- When in doubt, consult a professional installer.
