

Electrical Agreement 2016 CAYUCOS SEA GLASS FESTIVAL

The Sea Glass Festival works hard to provide a successful venue for its Vendors by offering electricity to those Vendors whose displays require illumination. Vendors should be aware that there are limited booth locations that can accommodate electrical hook-ups.

The Sea Glass Festival will provide, for a fee of \$50 per booth, the use of a grounded 10-15 Amp power cord with dual splitter.

No more than a total of 1000 watts may be plugged in. Vendor can plug in only two cords (in good working condition), and cannot further split the lines beyond that. Use of LED lighting is mandatory, as we no longer allow incandescent or halogen lights.

Any violations of these requirements, or any condition deemed unsafe during the Fire Marshall's inspection, shall result in the Vendor being denied power. We don't want this to happen, and we imagine you don't either. So, please pay attention to these requirements and contact us if you have any questions.

The Sea Glass Festival and the Fire Marshall reserve the right to refuse power to any Vendor who disregards these requirements or whose equipment poses a fire hazard. In such an event, Vendor's electrical fee will not be returned.

PLEASE NOTE: The main power cord belongs to the Sea Glass Festival and shall not be removed by the Vendor. In the past, we've had cords walk off after the Festival. These are expensive power cords and if we keep losing them, we'll have to raise the electrical fee. Again, we don't want to do this. So please provide the following information, and in the event that your cord is inadvertently removed by an overzealous helper at the end of the Festival, we will need to charge your credit card.

Thank you,

The Sea Glass Festival Committee

I have read and agree to the requirements above. I agree to pay \$30 for any cord or power strip missing from my booth during or at the end of the event, by charging my VISA/MasterCard below.
