

All-on-6 Implants Case

24-hours after surgery using StellaLife Recovery Kit

Description

Patient had significant osseous recontouring, a full crestal incision with significant bone reduction and guided place 6 implants.

Method

The patient was placed on StellaLife VEGA Oral Care Recovery Kit course three times daily. The patient was seen 24-hours after for a follow-up and re-evaluation.

Conclusion

At the 24-hours follow-up appointment, a clinical evaluation revealed accelerated healing. The surgical site looked like a week of healing after just one day.

“We use the VEGA Oral Care Recovery Kit for all of our All-on-6 procedures, which has become a standard part of our protocol to reduce opioids prescribed and get optimal surgical outcomes...”
