StellaLife®
VEGA® Oral Care

Recovery Kit APPLICATION GUIDE

StellaLife® VEGA® Oral Care Recovery Kit is a revolutionary new technology that has been clinically proven to accelerate healing, relieve pain and reduce swelling in dental patients' after both surgical and non-surgical procedures. The Kit consists of Gel, Spray and Rinse, all chemical-free. Uses include, but are not limited to, wisdom teeth extraction, dental implants, bone and tissues grafting, osseous surgery, SRP, mucositis, aphthous ulcers, dry socket and denture sores.

StellaLife products line encompasses a broad spectrum of applications, ranging from recovery to maintenance, and from the treatment of oral inflammatory conditions to pain management.*

*The uses for this product are based on traditional homeopathic practice. These statements have not been reviewed by the Food and Drug Administration. Before using, please check the labels for directions, warnings, uses, and other information. All StellaLife products are FDA registered, cGMP and HPUS compliant.

HOW TO USE VEGA ORAL CARE

STEP
1

VEGA Oral Care **Rinse**

Swish 10-15 ml for 1-2 minutes, expectorate.

STEP
2

VEGA Oral Care **Spray**

Spray 4 times **under the tongue**.

STEP
3

VEGA Oral Care **Gel**

Apply to the gum at the surgical area with a cotton swab.

Start 3 days before the surgery or procedure to increase therapeutic levels. Continue for 7 days after the procedure.

- Apply 3-4 times per day, preferably after meals.
- Refrain from drinking or eating for at least 20 minutes after application.
- Use all three products at the same time in the order outlined.
