

StellaLife® VEGA® Oral Care CLINICIAN'S GUIDE

EXPOSE AND BOND, ORTHO ANCHORAGE PLACEMENT, APICOECTOMY

Recovery Kit. See How to Use Recovery Kit. Alternative, Post-op: Patient instructed to rinse for 1-2 minutes and expectorate, immediately apply Gel at the cervicogingival junction. For best results start 3 days pre-op. Repeat above steps 3-4 x/day for 7 days after the procedure.

BONE GRAFTING PROCEDURES

On-lay Bone Graft • Sinus Lift, GBR • Osseous Surgery

Recovery Kit. Patients is started 3 days before and continues for 5-7 days post-operatively.

REMOVAL OF IMPACTED DENTITION

Recovery Kit. Refer to how to Use recovery kit.

IMPLANTS

Gel and Rinse for routine procedures, not involving BG, CTG. Post-op: Patient instructed to rinse for 1-2 minutes and expectorate; immediately apply Gel at the surgical site and vestibule area. Repeat above steps 4x/day. After 5 days, patients are instructed to soak a Q-tip in the Rinse and swab clockwise around the healing abutment for 1 minute, 2-3x/day. Continue for the next 2-3 months during integration. When patients are seen for final check prior to the restorative stage, they are instructed to apply Rinse with a Q-tip at the cervicogingival junction of the future restoration 2x/day as part of routine hygiene.

PERI-IMPLANTITIS

Gel and Rinse or Recovery Kit

1. If soft tissue inflammation only without bone loss: Remove the cause (debris, cement, etc.). Use 24G angiocath to introduce into the pocket and rinse it out with VEGA Oral Rinse (up to 20 cc). Home care: Apply the Rinse with a Q-tip at the cervicogingival junction for about 1-2 min with gentle pressure massaging the gum, then immediately apply Gel in the same area. Restrain from eating or drinking for 20 minutes after application. Repeat 3-4x/day for 1 month, then re-evaluate.
2. If bone loss is present: detoxification, implantoplasty, GBR per individual protocol. Home care: Apply the Rinse with a Q-tip at the cervicogingival junction for about 1-2 min with gentle pressure massaging the gum, then immediately apply Gel in the same area. Restrain from eating, drinking for 20 minutes after application.

ROUTINE EXODONTIA

Gel and Rinse Post-op. Patient instructed to rinse for 1-2 minutes and expectorate; immediately apply Gel at the surgical site. Repeat above steps 4x/day.

SCRIP

Gel and Rinse or Recovery Kit. Post-op: Patient instructed to rinse for 1-2 minutes and expectorate, immediately apply Gel at the cervicogingival junction. Repeat above steps 4x/day. Home care: Apply the Rinse with a Q-tip at the cervicogingival junction for about 1-2 min with gentle pressure massaging the gum, then immediately apply Gel in the same area. Restrain from eating, drinking for 20 minutes after application. Repeat 3-4x/day for 1 month, then re evaluate. Note: To reduce bleeding during the SCRIP, start patients on the regimen 3 days pre-op. See How to Use Recovery Kit.

CTG

Recovery Kit. If autogenous tissue is used from the palate, ask patient to apply with Q-tip StellaLife Gel at the harvest site as well as at the recipient site and vestibule area around the surgical site.

1. ABx and intra-op PRP/PRGF/PRF recommendations per clinician's protocol.
2. After initial use of recovery kit regimen, patients should continue to use rinse 2x/day until complete healing is observed.

NONSURGICAL PROCEDURES

Dental Impressions: Gel and Rinse. Starting 3 days before, Rinse for 1-2 minutes, apply Gel at the cervicogingival junction. Repeat up to 4x/day.

Aphthous Ulcers: apply Gel to the ulcer with a Q-tip 5-7x/day. Symptoms/lesion should resolve within 2-3 days. Rinse is a very beneficial adjunct to the Gel and should be used together.

Mucositis: Gel and Rinse or Recovery Kit for 1 month, then re-evaluate.

Dry socket: Gel and Rinse. Apply Gel in the office first, allow to take effect for 10 minutes, then check with the patient. They will experience immediate relief. For home care, use Rinse and Gel 4x/day. Rinse 1-2 minutes, then immediately apply Gel. Restrain from eating 20 minutes after application.

About StellaLife® VEGA® Oral Care

StellaLife® makes oral health and pain management solutions that improve dental patients' experiences. We believe that better oral health comes from better ingredients and better formulations. Our homeopathic approach is an extremely effective alternative to traditional products.

VEGA® Oral Care solutions are clinically proven* to reduce pain, bruising and swelling, with a faster healing time. They contain sixteen active ingredients that are part of Homeopathic Pharmacopeia of the United States (HPUS). In addition, our solutions deliver exceptional long-term oral health care. All done in a more natural way.

StellaLife products line encompasses a broad spectrum of applications, ranging from recovery to maintenance, and from the treatment of oral inflammatory conditions to pain management.*

StellaLife® receives top rating and **Editors' Choice Award**, the highest distinction given by THE DENTAL ADVISOR.

How to Use Recovery Kit

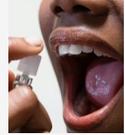

STEP
1

VEGA Oral Care Rinse
Swish 7-10 mL for 1-2 minutes, expectorate.

STEP
2

VEGA Oral Care Spray
Spray 4 times **under the tongue**.

STEP
3

VEGA Oral Care Gel
Apply to the gum at the surgical area with a cotton swab.

Start 3 days before the surgery or procedure to increase therapeutic levels. Continue for 7 days after the procedure.

- Apply 3-4 times per day, preferably after meals.
- Refrain from drinking or eating for at least 20 minutes after application.
- Use all three products at the same time in the order outlined.
