

# COMPANY PROFILE

## Our Mission

StellaLife® is a biotech company on a mission to improve people's lives and significantly reduce, or in some cases eliminate, the need for narcotic pain medications and steroids. VEGA® Oral Care is formulated to temporarily reduce post-surgical dental pain, accelerate healing and promote optimum oral health. We believe that better healing can be done more naturally.

Less pain. Less swelling. Less bruising.  
Less medication. More peace of mind.

## Intelligent Healing®

Limiting exposure to toxins is essential in ensuring good health. Intelligent Healing starts with the extraction and formulation of natural ingredients from botanical plants and minerals. We don't use chemicals or synthetic ingredients.

Better ingredients. Better formulations.  
Better healing.

## Our Start

Years of researching, experimenting and collaborating with leading chemists, dental specialists, physicians, and pharmacists led us to the creation of StellaLife. With the introduction of patent applied VEGA Oral Care, we deliver on our vision of better healing in a more natural way through homeopathic solutions. We connect health with nature. Our innovative products deliver results and promote a lifetime of good health and well-being.

## Our Values

Customer focus. Respect for people. Innovation and excellence. Passion for natural healing and the environment.

## Manufacturing

StellaLife products are manufactured in the United States utilizing homeopathic ingredients following HPUS and GMP guidelines.

## Better Oral Health. Naturally.

### VEGA Oral Care

StellaLife VEGA Oral Care is changing the way dental professionals treat pain after oral surgeries and other dental procedures.

Patients often require narcotic pain medications and steroids for postoperative recovery. The VEGA Oral Care Recovery Kit is ideal as adjunctive therapy for post-surgical treatment and can significantly reduce, or in some cases eliminate, the need for narcotic pain medications and steroids.\*

Our solutions are formulated to temporarily relieve pain, decrease swelling, reduce bruising and improve patients' post oral surgery recovery as well as promote long term oral health. The use of the patent-pending formula is optimal after wisdom teeth removal, placement of dental implants, bone grafting, osseous surgery, connective tissue grafting and other oral procedures.\*

The VEGA Oral Care Recovery Kit consists of the Spray, Gel and Rinse. When used regularly, the gel and rinse offer a long-term maintenance regimen to promote exceptional oral health without staining teeth.\*

StellaLife is passionate about the benefits of natural ingredients as healthier and safer alternatives for advanced healing and optimum oral health.

\*The uses for this product are based on traditional homeopathic practice. These statements have not been reviewed by the Food and Drug Administration.

# StellaLife VEGA Oral Care Case Studies and Reports

## Post-surgical management of third molars removal

**Background:** a series of nine case reports evaluated the effects of VEGA Oral Care as adjunctive therapy for post-surgical management after extraction of four full bony impacted third molars.

**Conclusion:** patients in our case studies on average reported requiring fewer narcotic pain medications and recovered 1 to 2 days more quickly when compared to the patients in other studies that used IV, oral or submucosal steroids. VEGA Oral Care provides an effective way for patients to decrease swelling, reduce pain and recover quicker after oral surgery.

## Bilateral mandibular reconstruction with BMP

**Background:** patient underwent bilateral mandibular reconstruction with BMP and titanium membrane/mesh. Significant post-operative swelling was expected for more than 2 weeks due to BMP bone grafting and reconstruction. Clinical exam revealed advanced healing with minimal swelling after 1 week post-op. The patient reported minimal pain requiring fewer painkillers.

**Conclusion:** the use of VEGA Recovery Kit accelerated recovery, significantly decreased post-operative swelling and relieved pain allowing patient take less pain medication.

## All-on-6 dental implant procedure case report

**Background:** patient had All-on-6 procedure performed. This patient had full mouth extractions and aggressive alveoloplasty performed. The implants placed, multi-units abutments torqued, and flap re-approximated and closed. VEGA Oral Gel applied upon completion of the surgery.

**Conclusion:** after 40 minutes the surgical site shows minimal or no swelling, no bleeding and very healthy looking tissue (see video clip and photo). If the Gel was not used, one would anticipate significant swelling 1 hour after the procedure. Advanced healing was observed.

## Post-surgical management after periodontal surgical procedures

**Background:** a series of fifty case reports evaluated the effects of VEGA Oral Care as adjunctive therapy for post-surgical management after pocket reduction osseous surgery, connective tissue grafting, extraction and site preservation bone graft.

**Conclusion:** patients on average required fewer narcotic pain medications and recovered more quickly when compared to the control side.

## VEGA Oral Rinse reduction of anaerobic bacteria case report

**Background:** Mint (by Breathometer) was used to measure anaerobic bacterial load in ppb. After brushing teeth, the patient had a baseline measurement. After rinsing with VEGA Oral Rinse the measurements were done at 5, 10, 30 minutes and hourly for the next 3 hours. The anaerobic load in ppb dropped in half after 30 minutes and stayed constant for over 3 hours.

**Conclusion:** just single application of VEGA Oral Rinse significantly reduces anaerobic bacterial load and maintains it for over 3 hours.

## Use of VEGA Recovery Kit for management after lower jaw cyst removal

**Background:** patient underwent removal of completely bony impacted canine, enucleation of a 18 x 20 mm cyst associated with it and bony reconstruction. The patient was placed on VEGA Recovery Kit 10 day regimen starting 3 days before procedure. One week post-op pictures were taken and pain as well as recovery evaluated. On a 1 week post-op visit, soft tissue exhibited accelerated healing normally seen 3 to 4 weeks after similar surgery. Patient reported minimal pain and bruising after the surgery.

**Conclusion:** VEGA Recovery Kit significantly accelerated post-surgical healing, decreased swelling and provided adequate pain control.

## Mucositis and thrush case report

**Background:** patient with a long-standing bilateral buccal Mucositis placed on VEGA Oral Care Recovery Kit.

**Conclusion:** 1 month of treatment showed complete resolution of the lesion on the left side and over 80% resolution on the right side. Significantly accelerated healing observed with StellaLife VEGA Recovery Kit.

## Management of healing by secondary intention case report

**Background:** patient developed complete dehiscence of the surgical site and exposure of AlloDerm after connective tissue graft. Placed on VEGA Rinse and Gel applications.

**Conclusion:** completely healed after 3 weeks of using VEGA Gel and Rinse.
