

## Lichen Planus Case 1-week of StellaLife VEGA Oral Care Rinse and Gel

### Description

The patient had been diagnosed with Lichen Planus in 2012. The area became progressively worse over time. She had a biopsy taken a couple of years ago and referred to a dermatologist, who put her on oral steroids. The area got better, but the problem returned after a year. She did not like the way that she felt on steroids. It's been 1-2 years since the steroids. She could not eat not brush on the upper right side.

### Method

The patient was placed on StellaLife VEGA Oral Rinse and Gel course three times daily. The patient was seen 1-week after for a follow-up and re-evaluation.

### Conclusion

At the 1-week follow-up appointment, a clinical evaluation revealed significant resolution. One week course of VEGA Rinse and Gel helped resolve acute presentation of LP and clinical symptoms of mouth burning. I saw her today, and she had a big smile on her face.
