

Finally...you can be hair free!

“HAIR DID IT GO?” Hair Retarding Enzyme

Hair Did It Go? Is A Powerful hair retarding enzyme that will leave you silky smooth in as little as 5-15 treatments. **Hair Did It Go?** works on any hair color, type of hair, or skin tone. Results compare to those with laser.

Directions: Apply the enzyme immediately after waxing. Apply the remainder as many times as possible on the waxed area, rubbing it until it's dry, (you are forcing the enzyme into the hair follicle). The enzyme has a 72 hour life span. For the best results, apply within the first 48 hours.
