

# RELAX & WAX

## NO-SCREAM CREAM

### DIRECTIONS:

NO-SCREAM CREAM should be applied as a fairly thick layer and should not be rubbed into the skin like lotion. Once the cream is thick and white STOP! And let the cream absorb into the skin on its own. (this is when the numbing occurs) The skin should appear white after NO-SCREAM CREAM is applied and will absorb into the skin in 5-10 minutes but for best results you must wait the full 40-45 minutes before waxing. NO-SCREAM CREAM isn't messy or greasy, won't harm clothing and you can get dressed as usual. Since the cream does absorb into the skin it will not interfere with any waxing techniques.

If there is any white residue left on the skin a simple alcohol wipe or pre-cleanse before waxing is recommended.

NO-SCREAM CREAM can be used on all areas of the body. Including bikini area, lip, eyebrows, underarms and legs.

NO-SCREAM CREAM is FDA approved, safe for all areas and is formulated not to interfere with waxing.

*Finally - Waxing Does Not Have To Hurt!*
