Lake Erie Toolworks – ClampGAUGE Calculator – Usage Instructions

After installing the ClampGAUGE Calculator software ([available on our website](#)) on any of the listed platforms: (Windows, MAC, HTML, Android or iOS), the functionality of this program is the same except for the Print feature which is only available on WIN, MAC & HTML platforms and not on the mobile device platforms (Android & iOS). The following screenshots will guide you through the easy and intuitive use of this program.

The main Calculator screen is composed of a top “INPUT” screen and a bottom “OUTPUT” screen section. *(Figure 1)*

The goal is to select the various criteria options in the top INPUT section and press the “Calculate” button. This will display your proper type, quantity and positioning location for ClampGAUGES in the bottom OUTPUT section. Note, that if you make any adjustments to the top INPUT section criteria, it will blank out the bottom OUTPUT section results which will require that you press the “Calculate” button again.

Lake Erie Toolworks - ClampGAUGE Calculator - Rev. 3.1

INPUT

Select ClampGAUGE Kit: [Dropdown]

Select Measurement Type: inches mm

Select Board Thickness: [Dropdown]

Select Board Length: [Dropdown]

* Round Board Length To Nearest Dimension
