

*Blot, Brush & Blow*

**EASY 1-2-3-4 BLOWOUT USING KARECO PROFESSIONAL BRUSHES**

**Find out why professional stylists prefer the high quality, durability and comfort of KareCo.**

- 1 Gently blot freshly washed hair with an absorbent hair towel.
- 2 Detangle hair and section with the KareCo 9-Row Styling Brush. It won't break or damage hair and the soft bristles will glide through from root to ends. Pump up the volume in front by wrapping the roots in pin curl formation around two of the Small Thermal KareCo brushes. Allow these sections to set as you style the rest of the hair.
- 3 Blowout hair using the Large Thermal Round Brush to create bouncy, big curls. It utilizes a dome-shaped ceramic barrel that evenly spreads heat to speed a blowout and eliminate frizz.
- 4 Gently unravel hair from the Small Round brushes, misting with a medium-hold hairspray. Hair will be soft, free of frizz and the added lift throughout the crown. Flip hair upside down and run the Large Paddle brush gently through hair for soft volume.

Powered by 100% Advanced Ionic Conditioning Technology, KareCo brushes at home feature unique anti-bacterial bristles that emit Tourmaline ions with each brush stroke. Combining Ionic Tourmaline Plus Conditioning with an ergonomic, vented design. For more information please contact Jennifer Jeziorski at [jjeziorski@kareco.com](mailto:jjeziorski@kareco.com)
