# CORPORATE SALES GUIDE USA SPORT & WORKWEAR 2015

## **SCANDINAVIAN DESIGN**

At the heart of every Helly Hansen product lies an uncompromising blend of style and performance, deeply rootedin Scandinavian design. The cornerstone of all Helly Hansen gear, the Scandinavian design represents the optimal combination of purposeful design, confident protection, and style - this is why professional mountain guides, patrollers, and discerning enthusiasts choose Helly Hansen.

### HELLY HANSEN PRODUCT COLLECTION

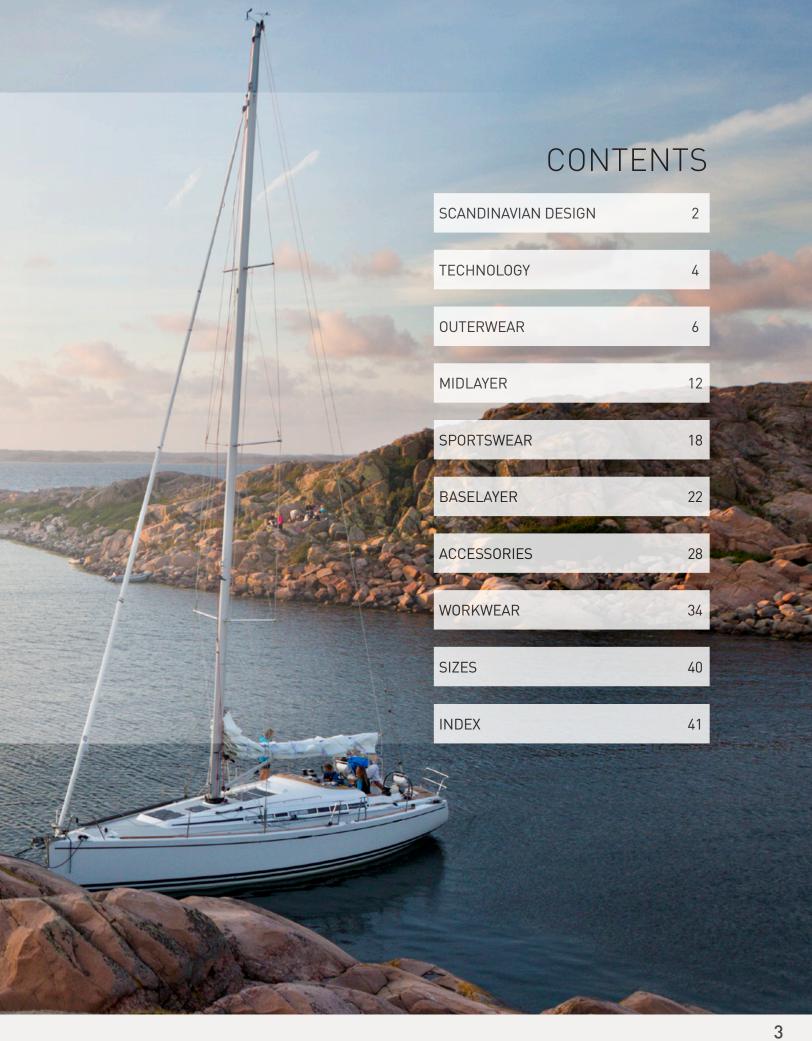

Norwegian captain Helly Juell Hansen founded our company in 1877, making the first supple, waterproof jacket for sailing in rough conditions. Their oilskin jackets, trousers and other equipment quickly grew in popularity, and gave rise to loyal following and decades of innovations stemming from Helly Hansen's birthplace in the rugged fjords of Norway. With the introduction of Helly Tech® waterproof breathable outerwear, the original fiberpile fleece midlayer, and the first technical baselayer with Lifa, Helly Hansen has a unique authentic history in outdoor and active apparel

## PREMIUM PRODUCTS FOR CORPORATE SALES

Whether your employees or clients are engaging customers in the mountains, playing on the water, or just looking stylish for an urban commute, Helly Hansen has a deep product offering to meet all of your needs. With full-service embellishment and service via the Helly Hansen Corporate Sales portal, we are pleased to present you with world-class products for your clients, colleagues, or employees through this special program.

Please enjoy the following product offering, and contact the Helly Hansen Corporate Sales Department at 800-435-5901 x 3032 to have them identify the best product options for your team or event.

## HELLY TECH®

#### **PROFESSIONAL**

For extremely challenging wet, cold and windy conditions and the toughest physical challenges, Helly Tech® Professional will keep you dry, warm and confident. The highly advanced Helly Tech® Professional fabrics are engineered to meet the most demanding professional requirements. They push the boundaries of technical fabric engineering and offer waterproof and breathability ratings tailored to the unique performance needs of professionals. All seams are fully taped and welded to our highest specifications for long lasting, professional grade performance.

The Helly Tech® Professional 3Ply latest development is enhanced with Flow membrane technology enabling an unparalleled breathability while still keeping the high level of protection on guides are demanding from their shells.

#### PERFORMANCE

For high intensity challenges in any weather conditions Helly Tech® Performance gear will keep you dry, comfortable and confident throughout your adventure. Specifically designed Helly Tech® Performance fabrics deliver sport specific performance with high waterproof and breathability ratings to keep you comfortable and focused on your challenge. All seams are fully taped for optimum waterproof performance.

#### **PROTECTION**

For everyday use and moderate weather conditions Helly Tech® Protection gear will keep you dry, comfortable and protected. Since the 1980's Helly Tech® fabrics have kept outdoor enthusiasts dry and comfortable by letting condensation and perspiration escape while keeping rain, wind and snow out. Helly Tech® Protection gear is fully seam sealed, waterproof, windproof and breathable.

## H<sup>2</sup>FLOW<sup>TM</sup>

H²Flow™ allows you to control your body's temperature. The insulation concept uses air to provide warmth and ventilation and lets you control the airflow that cools you down when necessary.

## **TECHNOLOGIES**

#### **BASELAYER**

We believe Lifa® is simply the best moisture management technology on the planet. When you listen to what gear editors, outdoor pros and consumers are saying, our view seems to be well supported!

When doing high-energy activities, too much sweat can make you cold and uncomfortable. Lifa® Stay Dry technology is based on a fiber that is constructed in a completely different way than most other synthetic base layers on the market.

Our biggest invention within base layer technologies – Lifa® Flow – is a construction combining Helly Hansen's unique Flow technology with Lifa® Stay Dry technology fibers. Lifa® Flow delivers super quick drying next to skin, faster than other base layers on the market, and guarantees that you'll always feel dry and comfortable.

#### X-COOL

X-Cool quick dry fabric will cool you down when performing high intensity activity. Qucik-dry - Cooling - Performing.

#### CIS

With our new 3-in-1 jackets you will be ready for a wide range of temperatures, weather conditions and levels of activity.

To meet personal preferences and individual needs our Component Insulating System (CIS) add another dimension of versatility and style to 3-in-1 jackets. With standardized zip-in solutions the jackets and midlayers can be used together, interchanged and customized to create your own perfect 3-in-1 solution.

#### RECCO®

RECCO® technology makes you searchable for organized rescue in the event of an avalanche accident. The two-part technology consists of a detector used by the rescuers and reflectors that are integrated into the apparel. Together they enable directional pinpointing of a victim's precise location using harmonic radar. The system requires no training and no batteries to function, meaning it is always "on" and ready. RECCO® reflectors do not prevent avalanches nor do they guarantee location or survival in the event of a burial.

#### **PRIMALOFT**

PrimaLoft® is a synthetic insulation technology, offering superior thermal properties with excellent water repellency. It is made up of ultra-fine fibers that form air pockets to trap heat inside.

#### **POLARTEC**

We work extensively with Polartec®, a famous manufacturer of light-weight and warm fleece, which is known for performance, durability and aesthetics. We use our combined knowledge of fleece fabrics to keep you warm and dry.

#### ALLIED DOWN

Allied Feather & Down Corporation is a leader in quality and a reliable source for top quality, high fill power down and feathers. The high quality European Down have outstanding warmth-to-weight ratio and unmatched longlasting loft.

# SIZE CHART

\* Please note changes to the size charts below.

#### EN 340:2004

Protective clothing - General requirements

Helly Hansen protective clothing is designed and manufactured in such a way that it does not have any effect on the user's health or hygiene.

The design guarantees a correct fit and protection for the body when used correctly.

The design and material offer function and comfort. The material offers good fade-resistance, stability, strength and durability, to ensure that the garments have a long life, even with heavy use and many washes.

Size grading is based on body measurements in centimeter, see the size quide.

All garments are properly marked on garment labels and on external labels to indicate the information required for the standard.

Check your body measurements as instructed and compare with the data in the table.

Example: If your chest measures 44 inches you should wear size XL.

Chest: With arms relaxed at sides, measure around fullest part of chest.

Waist: Measure around natural waistline, smallest part of waist.

Hips: Standing with legs together, measure around fullest part of hips.

Inside leg: Measure inside length of your leg from crotch to bottom of ankle.
