Reps. Reps. Reps.

Our Rugby Training Machines can put the ball anywhere on the field for both offensive and defensive drills.

The Drop Attack rugby training machine is a pass and kick machine that maximizes your training time on the most difficult to practice phases of the game. True to its name, this unit will deliver a realistic drop kick, firing the ball 40-50 yards into the air. It also replicates chandelles (or up and under) and torpedo kicks, hundreds of precise repetitions per practice.

With a simple and quick adjustment to the wheel position the Drop Attack instantly becomes a passing machine. Passes to feet as well as powerful torpedo and spin passes can be thrown with extreme consistency.

A coach can now work on different combinations that they want to play with forwards and defenders. For instance they can start the game with a drop kick and can get the forwards to work together to win the ball. For lineouts they can work with different set plays and just focus on throwing the ball down the line. The Drop Attack delivers all of the kicks and throws allowing the coach to focus entirely on training each athlete.

This unique training tool has solid polyurethane throwing wheels that firmly grip the ball for a precise ball delivery. The heavy-duty wheel guards protect the wheels and help to keep the them as dry as possible in inclement weather.

Rapid-fire and multiple ball drills are part of the Drop Attack's repertoire. Two independently running electric motors create not only a near instantaneous recovery time, but furnish enough power to put the rugby ball anywhere on the field. It can pivot instantly in any direction, accurately throwing passes or drop kicks to any location on the field.

Unique Features

- Ball cradle positions the ball perfectly for either passing or kicks.
- Two high-powered motors provide instant recovery, allowing rapid repetition and combination of drills.
- Handles safely facilitate tilting of wheel to locate and lock throwing head into desired position.
- Stand allows throwing head to pivot instantly in any direction, accurately throwing passes and kicks to any location on the field. Elevation changes are quick and easy.
- Solid guarded wheels are specially designed for minimal wear and will last the life of the machine with no need for pressure changes.
- Controller is accessible, visible and safely away from throwing wheels.
- Heavy-duty throwing wheel guards protect players, coaches, fingers and hands during operation.
- No assembly is required. Unit arrives fully assembled and ready for your immediate use.

Drop Attack in transport mode

Throwing Wheel Guards
Allows for safe operation

Controller
110V, 220V, 20 Amp
Circuit Breaker

Universal Ball Feed Cradle
Newly redesigned for more consistent ball deliveries

Ball Feed Slide
Allows for quick, consistent ball delivery

Trajectory Handle
Pivots throwing head instantly in any direction

Transporting Wheels
Large wheels make rolling machine easy, extremely portable

Pass & Kick Elevation Control
Locks elevation for precise repetition

Exceptional Quality Built Into Every Rugby Machine

- Aluminum casting is light, strong and weatherproof.
- Steel-plated frame for strength and weather-resistance.
- Solid polyurethane wheels provide tight spiral, long distance and accuracy and minimize marking and wearing of balls. No air pressure required.
- Two extra-wide solid transporting wheels make moving machine on and off field easy.
- Extra-wide tripod base insures real stability and safety.
- Two powerful variable speed motors drive two indestructible ball throwing wheels.
- Maintenance free! All bearings are sealed and good for life of motor.

DROP ATTACK™

Speed 70+ MPH

Distance Kicks 70+ yards, passes from 5 to 40 yards

Ball Delivery Throws torpedo and spin passes as well as drop kicks

Efficiency Instantly locate wheel tilt for realistic passing options with no tools

Accuracy Wide solid throwing wheels provide precise accuracy and repeatability

Recovery Time 5 seconds, with two motors it is almost instant

Portability Two solid, wide transporting wheels for easy transport on/off the field

Transportability Fits in any standard SUV or truck

Maintenance Solid broad-surface wheels, no air pressure adjustment ever needed

Safety Wheels are protected by guards
Level of Play High school, college and professional

Weight 90 lbs. without stand, 115 lbs. with stand

Electrical Requirements 110V and 220/240V available
