

Herbalizer Vaporizer Instructions

Step 1: Grind your material finely before loading the herbal chamber.

Step 2: Fill the chamber no more than half way full to achieve the most efficient and satisfying results.

Step 3: Cap the chamber with the magnetic lid and lock it in place in the center of the Herbalizer.

Step 4: Select the Vapotherapy option and set your temperature anywhere between 290-445 degrees.

How to Use with the Balloon Bag:

Step 5: Attach balloon bag to the herbal chamber.

Step 6: Press the fan button and wait 90 seconds to inflate your balloon.

Step 7: Detach the bag and inhale the vapor.

Step 8: Toggle on/off to turn off the fan or let it turn off automatically.

How to Use with the Whip Attachment:

Step 5: Attach the whip to the bowl

Step 6: Turn on the fan if you wish, or use the strength of your inhalation to pull warm air over the herbs in the chamber.

Step 7: Toggle fan on/off or let it turn off automatically.
