

VPSI Pharmacy Announcement

We are happy to announce that VPSI Pharmacy is officially open! Through VPSI Pharmacy we will be able to continue supplying you with the products you have always gotten from us that are switching to Rx status. We will also be able to carry products through our pharmacy that we couldn't before due to prescription status. This means that we can now be your one-stop-shop for prescription and over the counter drugs and health supplies, without you ever needing to step foot in a pharmacy or vet clinic!

How to Submit Prescriptions:

1. Producers have a few options for submitting their prescriptions.
 - Original, handwritten prescriptions from your vet can be given directly to your salesperson or mailed to the pharmacy: **2123 W. Wilden Ave, Bldg B, Goshen, IN 46527**
 - You can also have your vet submit your prescription. If it's the first time your vet will be running a prescription for you through VPSI Pharmacy, then they need to mail the original, handwritten prescription to the pharmacy. After your vet has submitted the first prescription for you they will be associated with your account in our system. They can then call, fax or email future prescriptions in addition to the option of mailing them.
2. Your prescription and order will be processed and the product will be delivered to you as soon as possible. Once your prescription is on file we can supply you with the Rx product as you need it. Your vet can authorize prescriptions for a period of up to one year.

Pharmacy Mailing and Contact Information

VPSI Pharmacy

Additional Information

1. Complying with the new guidelines.

We have been proactive about following every guideline that the FDA, State Board of Animal Health and the Pharmacy Board have put in place. We have done and are continuing to do everything on our end to make sure that we as a company are complying with the new regulations, so you as the producer or dealer will also be in compliance.

2. Products available.

VPSI Pharmacy will be a full line pharmacy of livestock and small animal Rx products. However, please note that we will not be carrying narcotics.

3. Drugs switching from OTC to Rx status on January 1, 2017.

For your reference, here is a list of water soluble drugs transitioning from OTC to Rx status:

chlortetracycline, erythromycin, gentamicin, lincomycin, lincomycin/spectinomycin, neomycin, oxytetracycline, penicillin, spectinomycin, sulfadimethoxine, sulfamethazine, sulfaquinoxaline, tetracycline

4. A note on Veterinary Feed Directives (VFD).

Veterinary Feed Directives (VFD) do not need to be sent to the pharmacy. Please send VFDs to:

Veterinary and Poultry Supply, Inc.
